Guest Rooms - MUR
Art Proposal v.3

Indigo
Dublin

FINDLATER'S HOUSE

Findlater's enterprise flourished, expanding with locations throughout Dublin's residential neighbourhoods, centring around a prominent headquarters at 29-32 O'Connell Street.

OLD LIBRARY

The Old Library is an early 18th-century building within the campus of Trinity College Dublin and forms part of the Library of Trinity College Dublin.

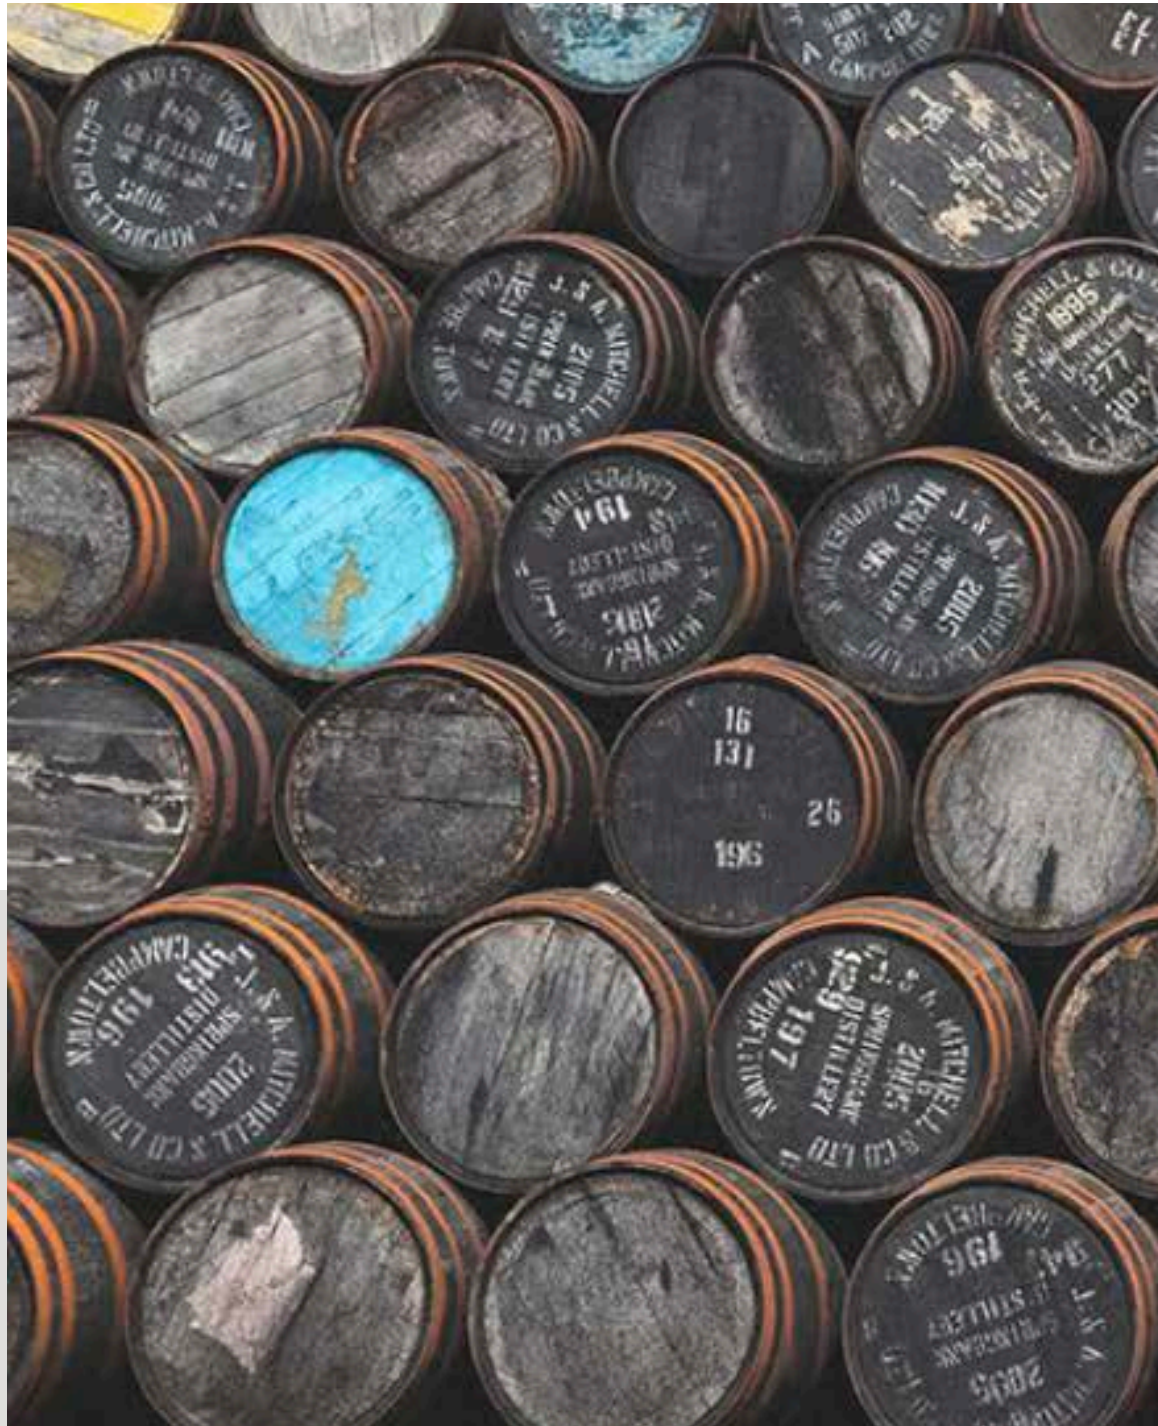

JEANIE JOHNSTON

The original Jeanie Johnston traded successfully between Ireland and North America for a number of years. The trading pattern was to bring emigrants from Ireland to North America, and then to bring timber back to Europe.

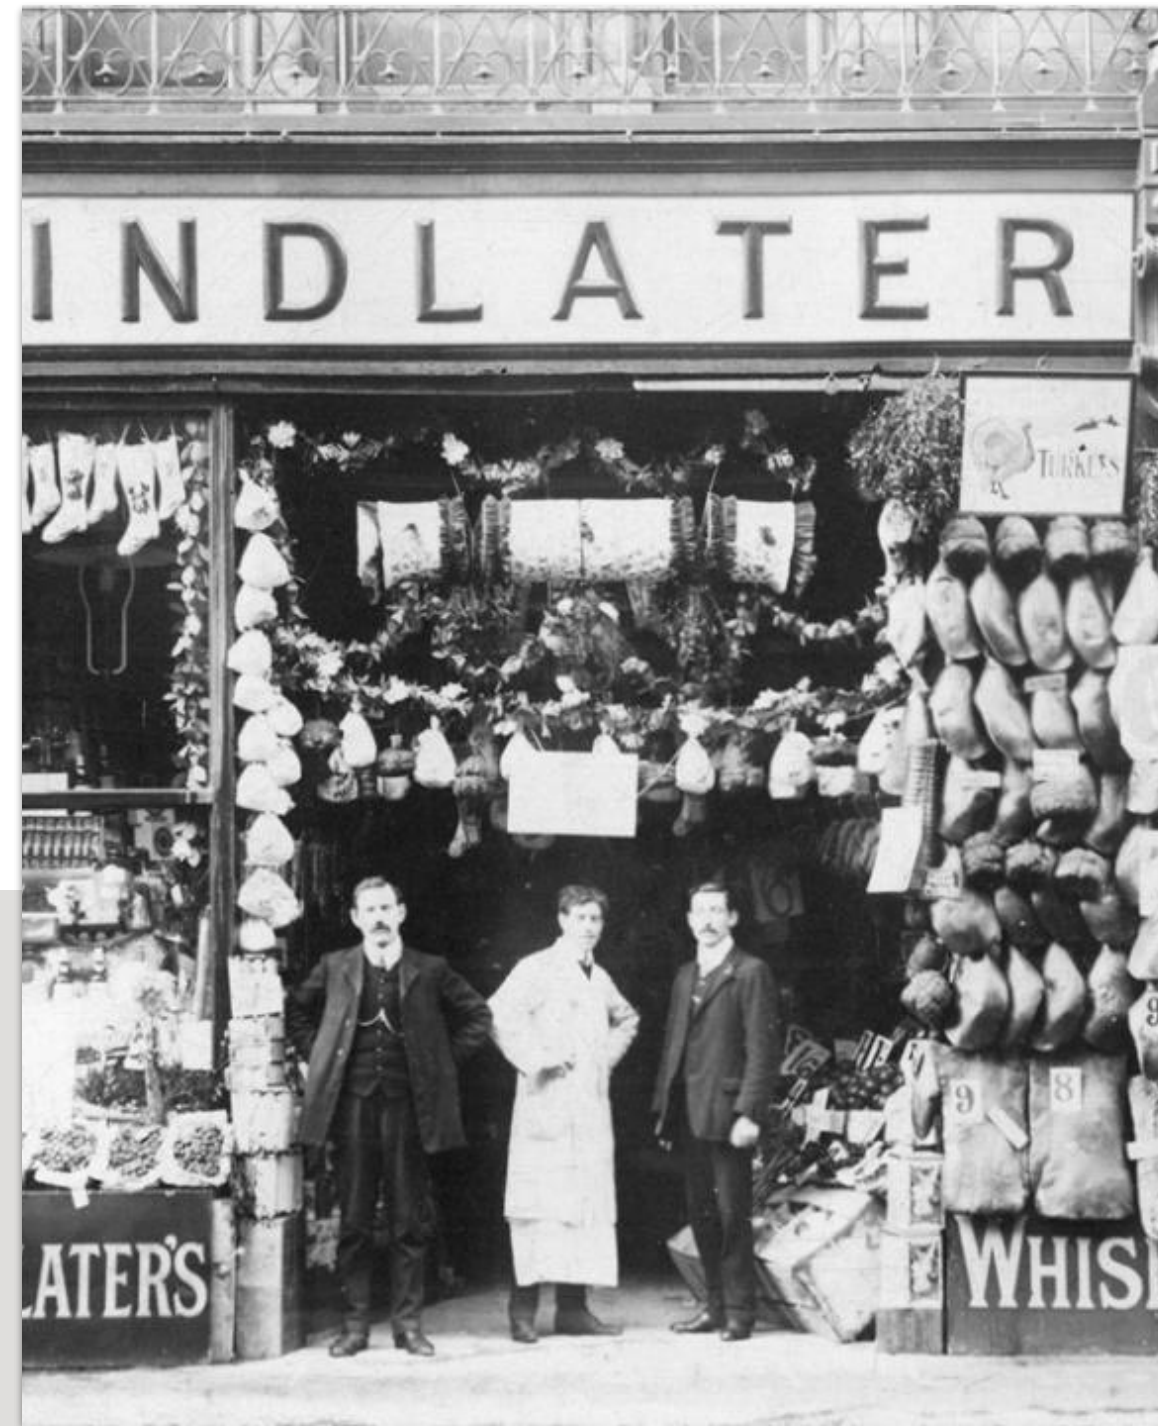

Findlater's has been a staple of Dublin's commercial and cultural landscape for over 200 years. Founded by Scottish spirit merchant Alexander Findlater in 1823, the business began as a modest whiskey and tea shop on Burgh Quay, eventually growing into a massive retail and hospitality empire across the city.

Whiskey & Porter

Findlater was a prominent importer and exporter of Irish and Scotch whiskey as well as Irish Porter, a dark and fermented ale named after the working-class street and river porters who drank it.

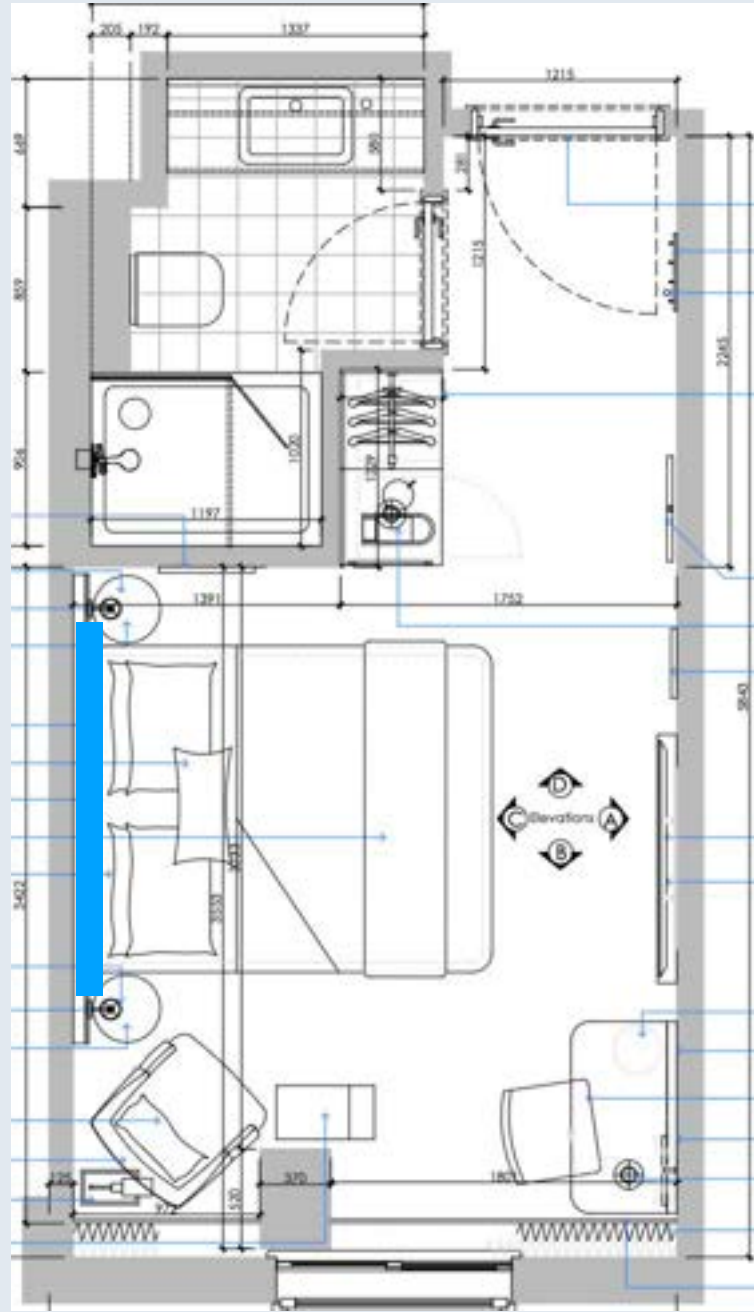

Findlater's Empire

By the end of the century, Findlater's enterprise expanded with locations throughout Dublin's residential neighbourhoods, centring around a prominent headquarters at 29-32 O'Connell Street.

Bloomsday

Alex Findlater great nephew to the founder, helped keep the city's commercial history alive by launching the Bloomsday Messenger Bike Rally.

Proposed location:
AR.P.02**Concept:**

Taking inspiration from Findlater's whiskey exports, we deconstruct a whiskey barrel and present it in framed format. Cut panels of plywood with an Oak veneer, 3d mounted, printed with content details and stained to create an aged appearance with added metal straps and studs. Maximum 40mm overall projection from the wall.

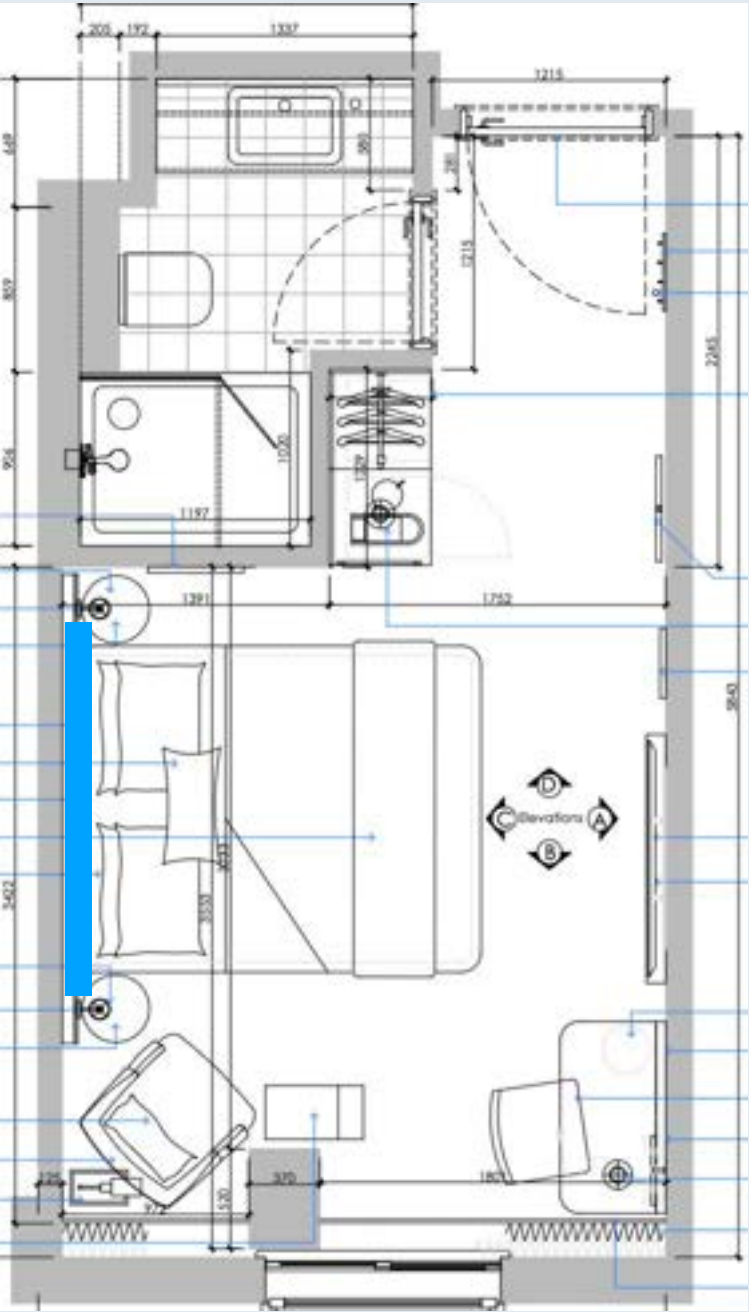

Option 1

Oak Veneer to be stained to have a more weathered appearance.

**Concept will need sampling and developing to ensure it works as a concept for the MUR.*

Proposed location:
AR.P.02

Concept:
Taking inspiration from The Bloomsday Bike Rally, inaugurated by Alex Findlater, a 3d textural map of Dublin in a brass metalier finish. The route of the bike rally embedded into the map in gloss red, with the map indicating prominent landmarks recognisable to visitors in Dublin.
Maximum 40mm overall projection from the wall.

Option 2

Metalier hand-finished, bespoke 3D routed panel with aged details

*Concept will need sampling and developing to ensure it works as a concept for the MUR.

Option 1

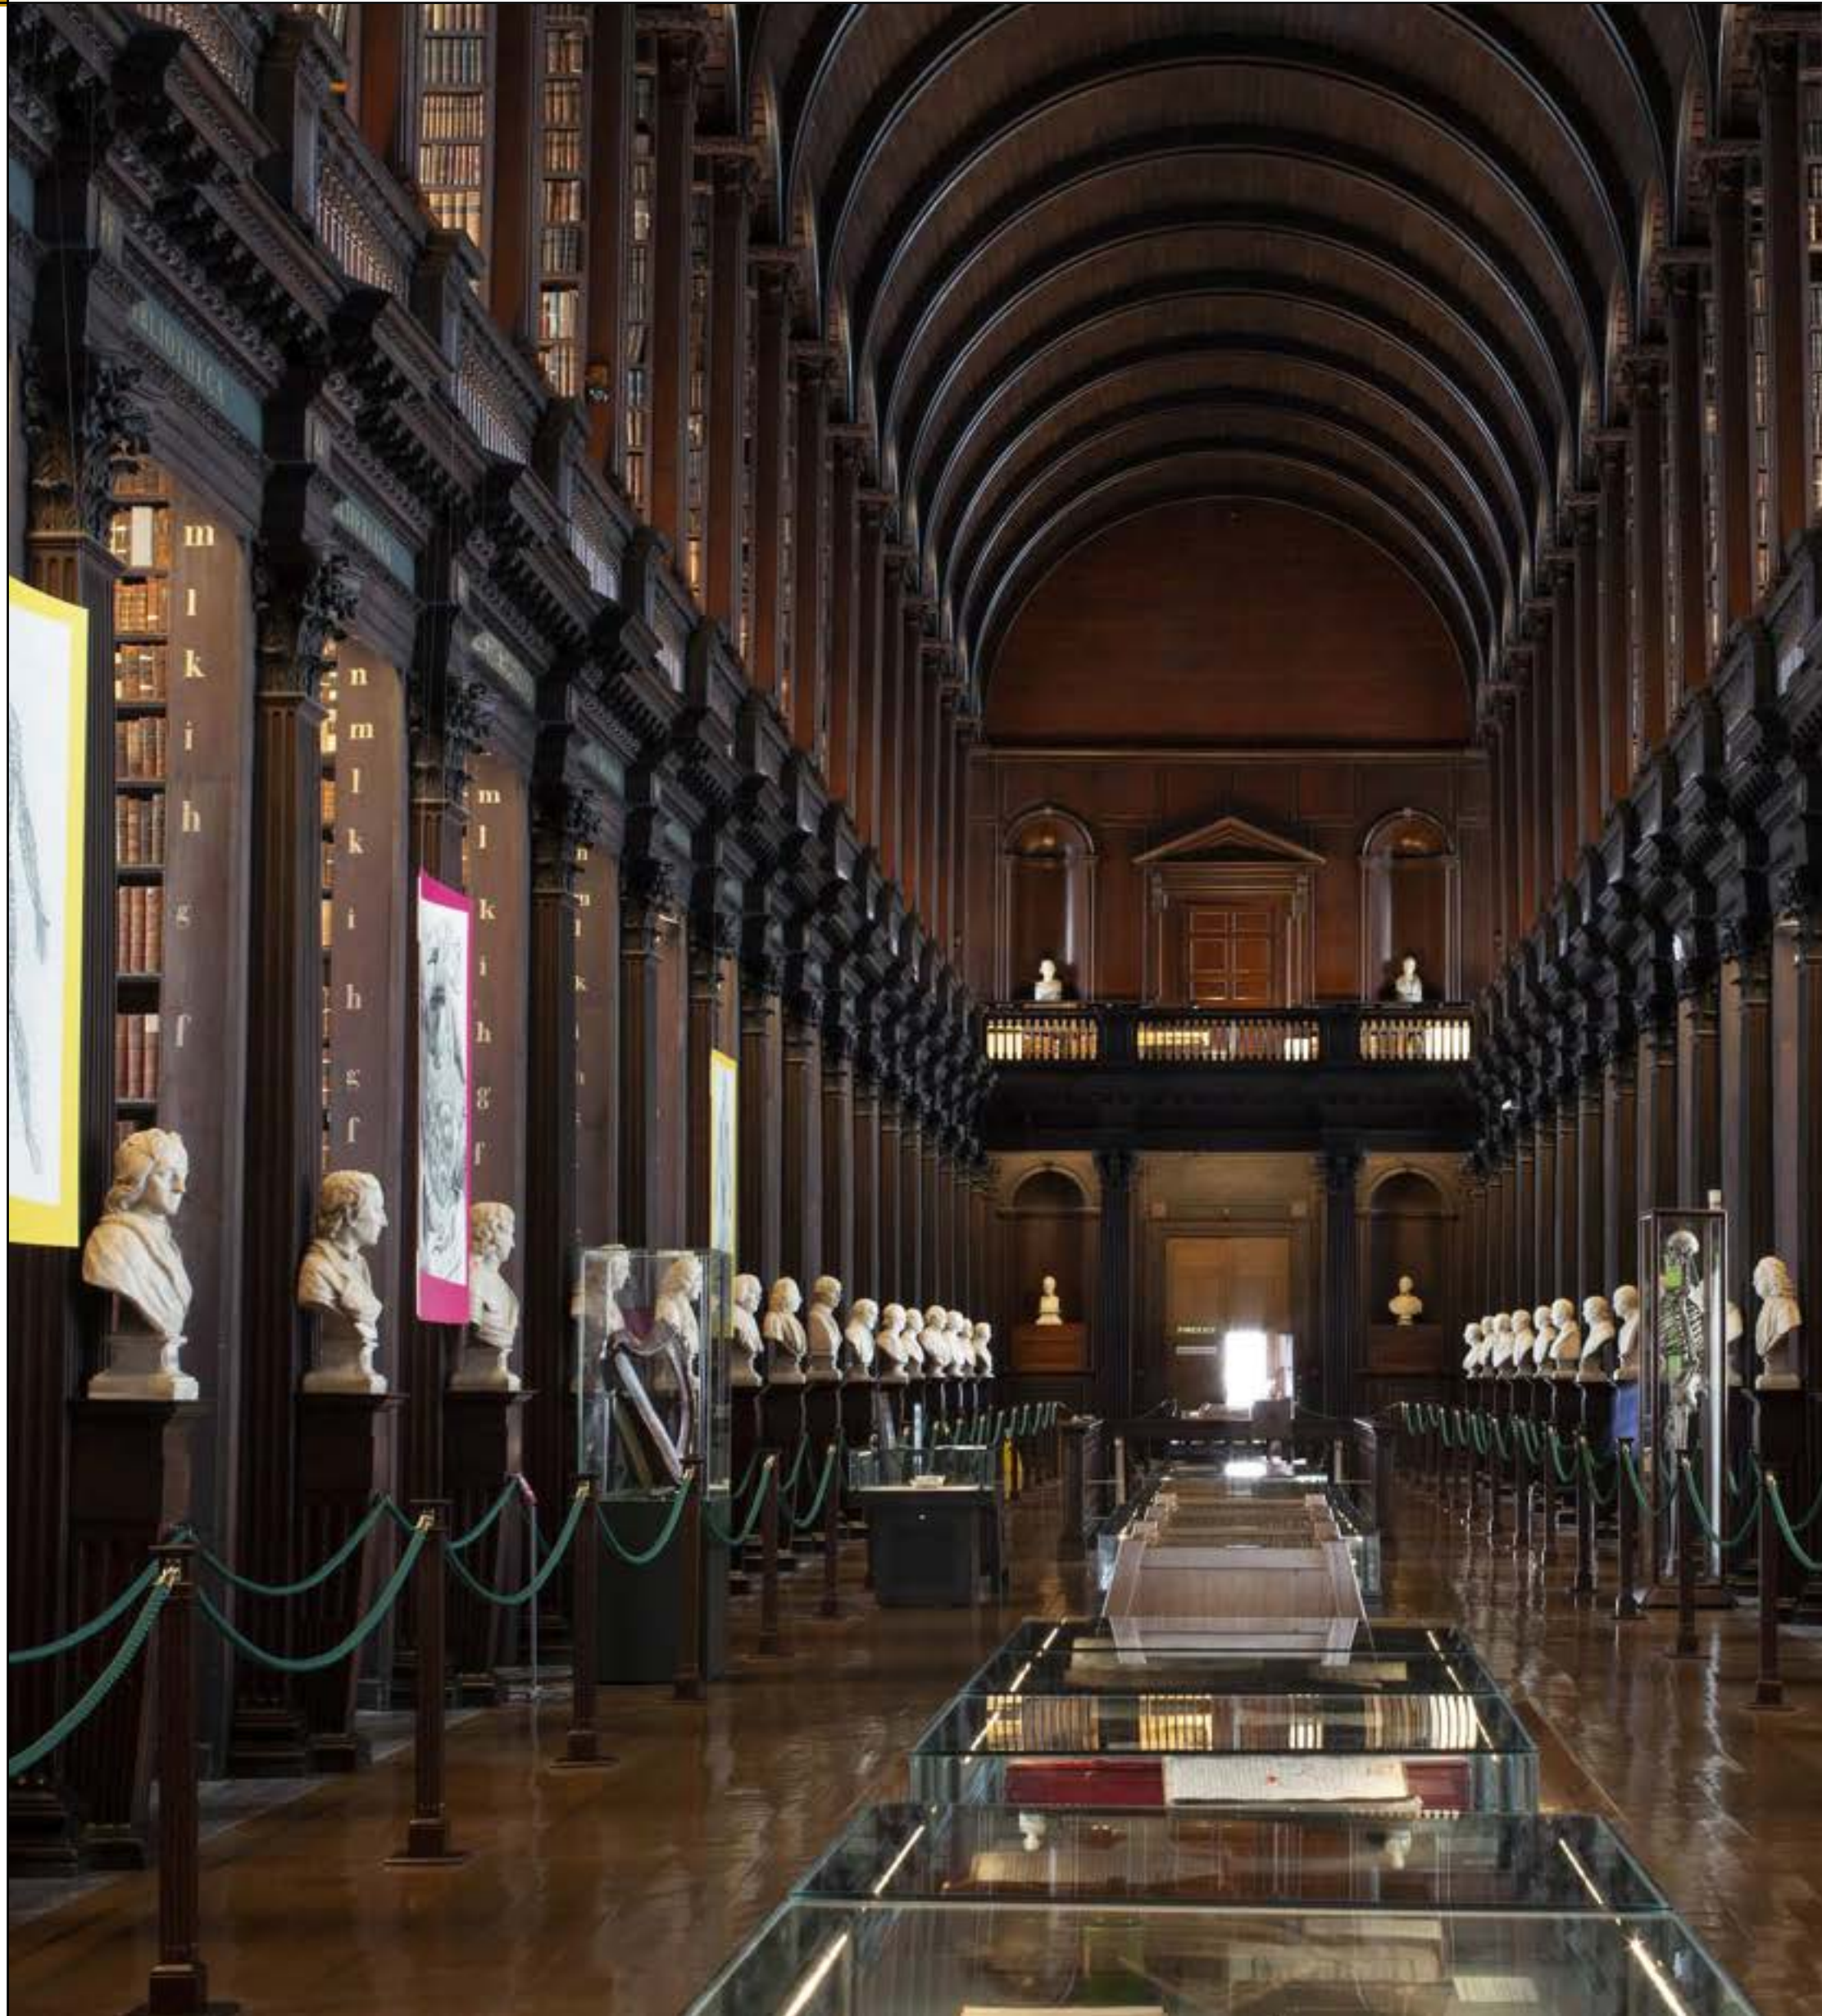

Proposed location:
AR.P.01 & AR.P.02

Option 2

Proposed location:
AR.P.01 & AR.P.02

The main chamber of the Old Library is the Long Room; a magical space at nearly 65 metres in length, it is filled with 200,000 of the Library's oldest books and is one of the most impressive libraries in the world. When built (between 1712 and 1732) it had a flat plaster ceiling and shelving for books was on the lower level only, with an open gallery. By the 1850s these shelves had become completely full; largely as since 1801 the Library had been given the right to claim a free copy of every book published in Britain and Ireland. In 1860 the roof was raised to allow construction of the present barrel-vaulted ceiling and upper gallery bookcases.

Marble busts line the Long Room, a collection that began in 1743 when 14 busts were commissioned from sculptor Peter Scheemakers. The busts are of the great philosophers and writers of the western world and also of those connected with Trinity College Dublin. Another treasure in the Long Room is one of the few remaining copies of the 1916 Proclamation of the Irish Republic which was read outside the General Post Office on 24 April 1916 by Patrick Pearse at the start of the Easter Rising.

There is also a medieval harp on display known as the Brian Boru harp, it is the oldest of its kind in Ireland. The harp likely dates to the 15th century and is a national symbol of Ireland, appearing on coins, the coat of arms, and the Guinness logo.

There are temporary exhibitions held in the Long Room which display the rich holdings of the Library and encourage further research and learning.

OLD LIBRARY

Architecture

The building of The Old Library began in 1709 and was designed by Thomas Burgh in a Palladian and neoclassical architectural style. In the 1850's the building was redesigned in order to house the growing book collection. The building itself is an important part of history as it provides a sanctuary for some very historically important manuscripts, books and music. The interior decorative marble busts celebrate philosophers, writers, and scholars who have contributed to the library.

Book of Kells

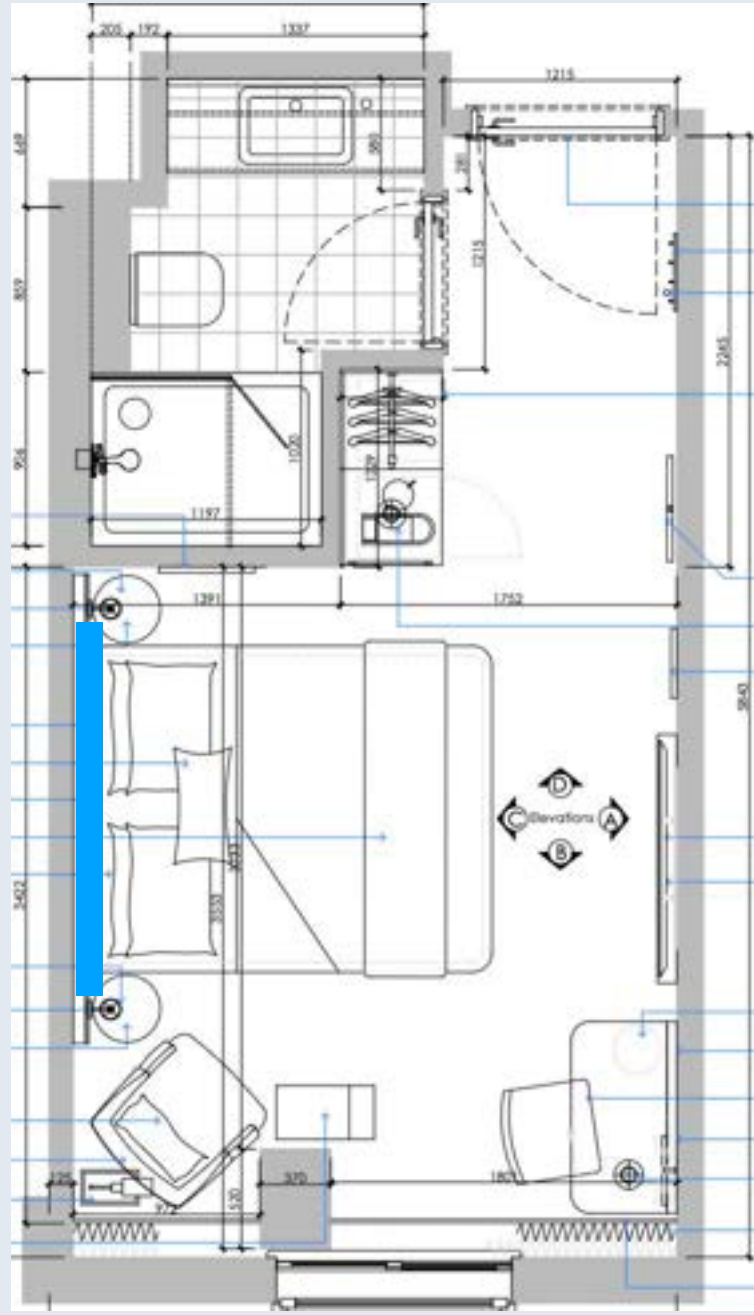

The book of Kells is a religious manuscript that is thought to be over 1,200 years old. It's historically important as not many manuscripts have survived this period of time and still remain in such a good condition. The pages include many intricate decorative illustrations and interesting lettering techniques that have retained their bright vivid colours due to the natural minerals that created the inks themselves.

Time capsule

On the same campus as the Old Library sits the more modern Library called, The Ussher. This opened in 2003 and features a modern, brutalist inspired concrete facade embedded with wood grain textures. In the year 2000, a time capsule was buried underneath the library whilst it was being built. This time capsule includes pieces of history including; a fragment of carving from the Long Room, a floppy disk and a Corrs CD to name a few. This celebrates the rich history of the Trinity College campus in a newly built Library, blending together history with the current day.

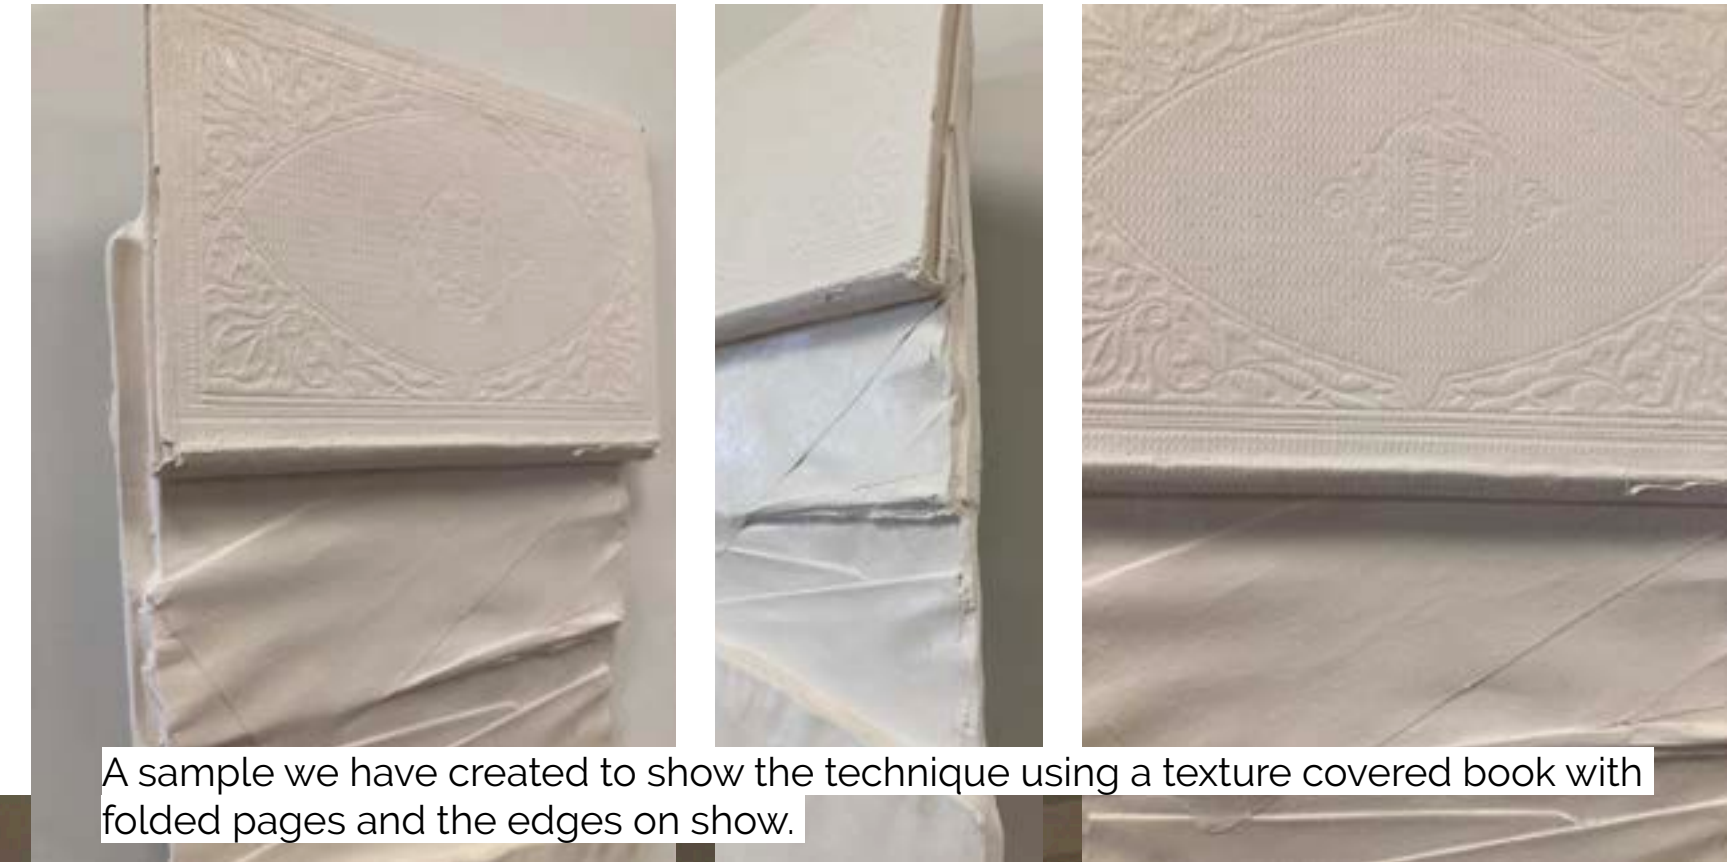

Proposed location:
AR.P.02

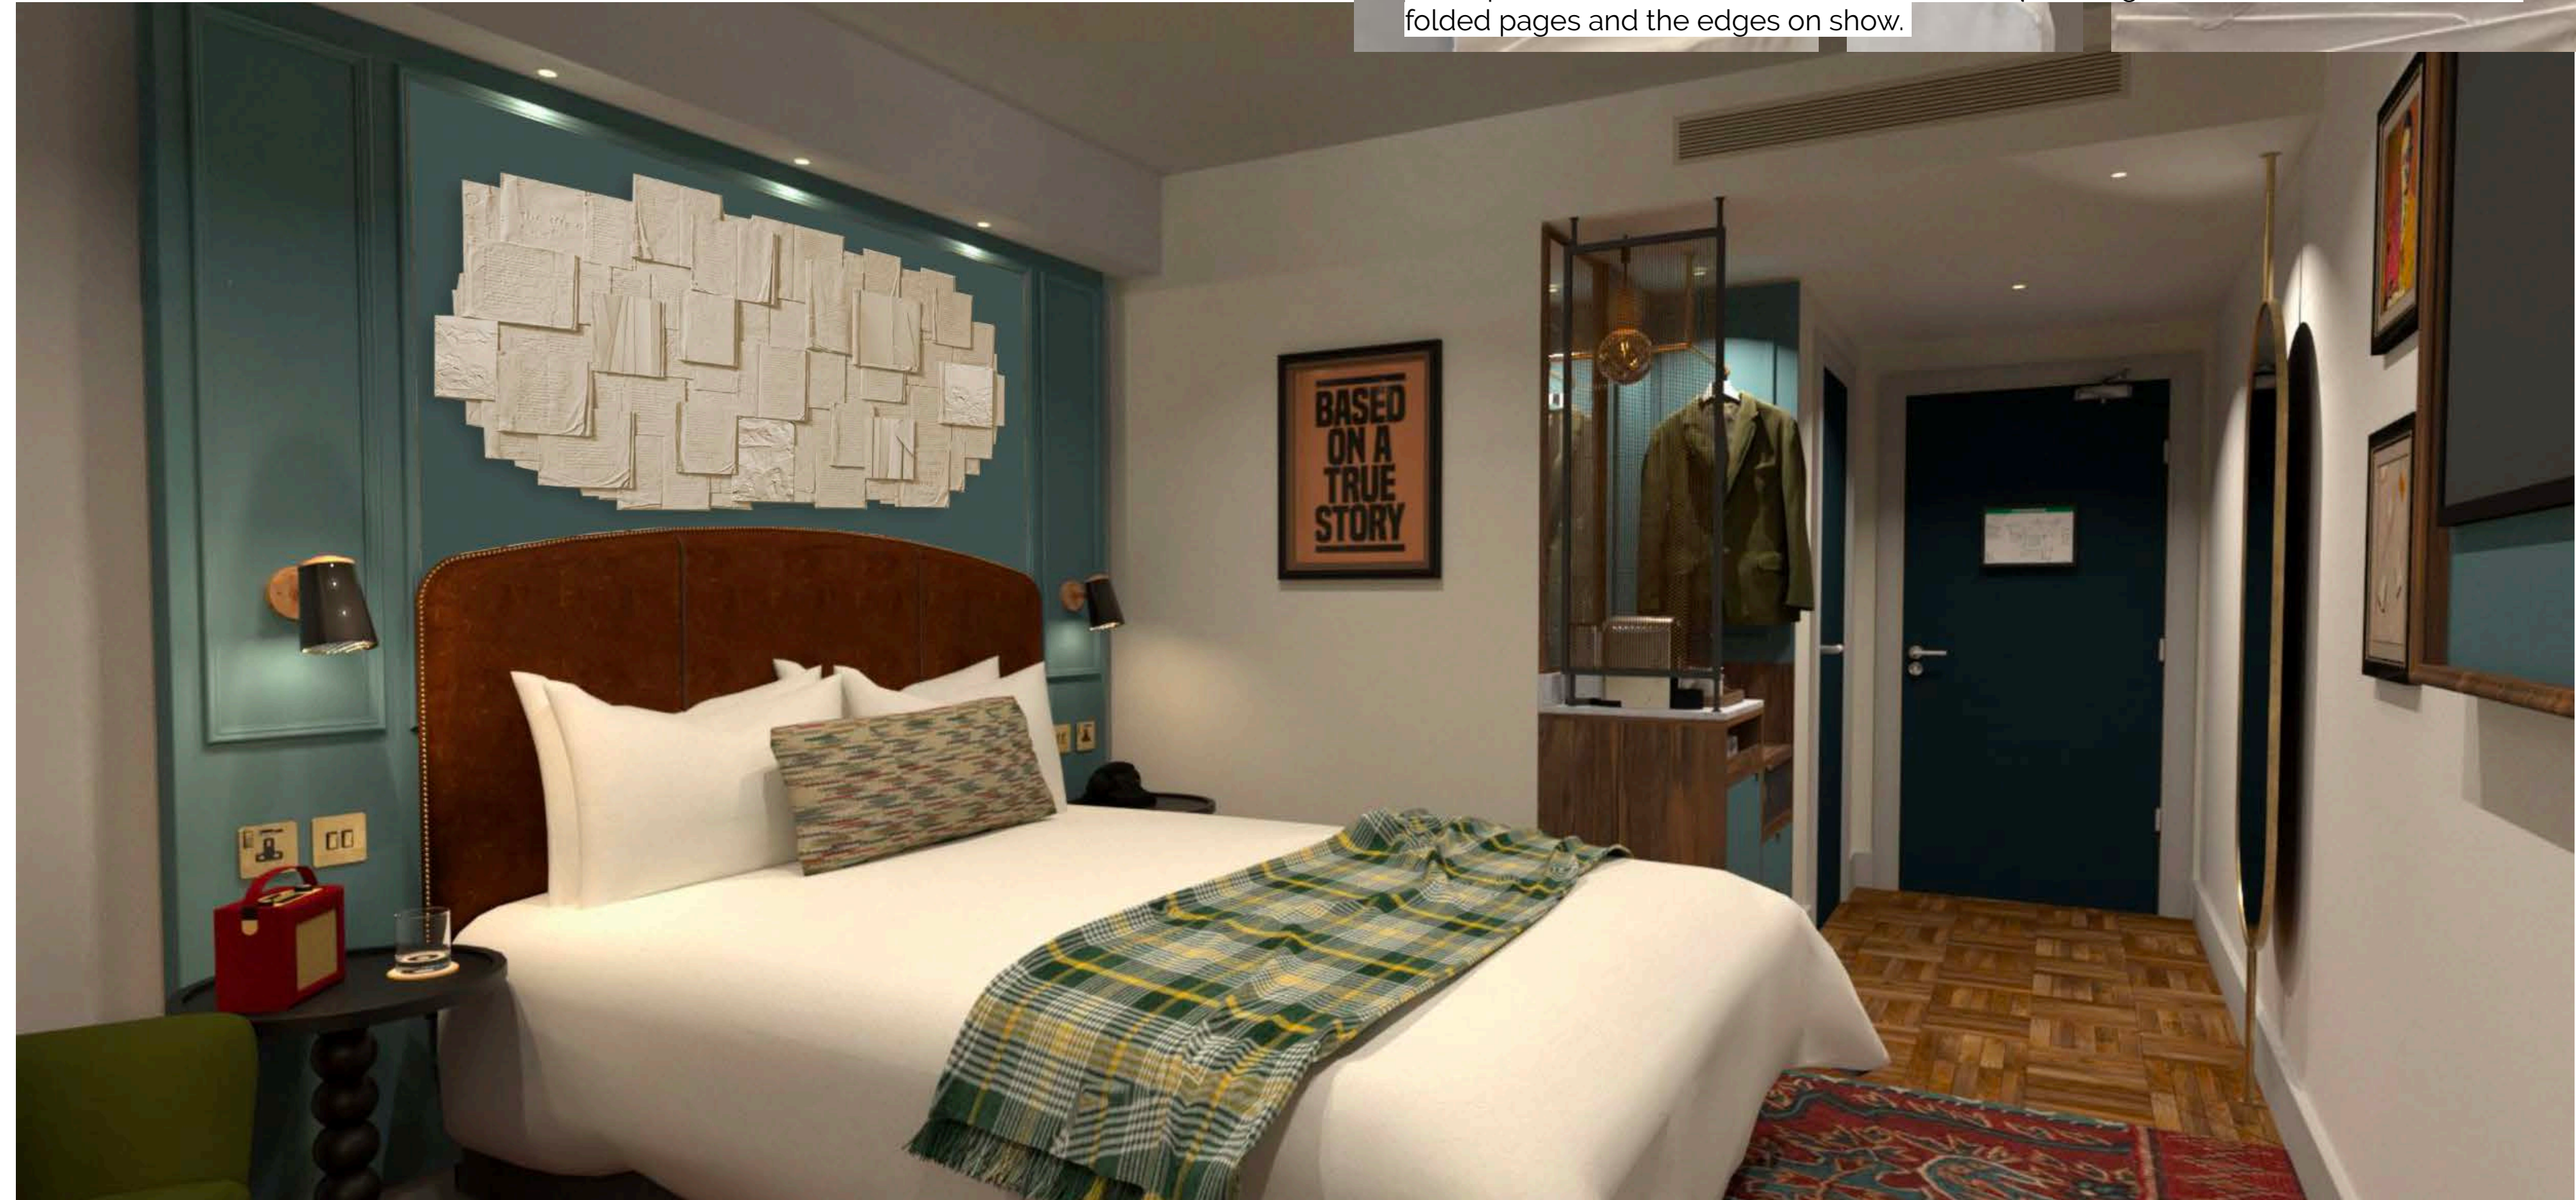

Concept:

Creating a mould from books to create a large panel to be hung above the headboard. This will feature different impressions, folded paper, text impressions, collections of pages as well as the stitched binding. Using different textures with different depths to add real interest to the piece. Cast artwork - material to be developed to keep the weight down. Maximum 50mm overall projection from the wall.

We will add the text, **"If one cannot enjoy reading a book over and over again, there is no use in reading it at all." - Oscar Wilde.**, to one of the pages of the books. Oscar Wilde was born in Dublin and is a celebrated author by Trinity College. The process on how we add the text will be developed in sampling stage due to certain complexities to the sculpture.

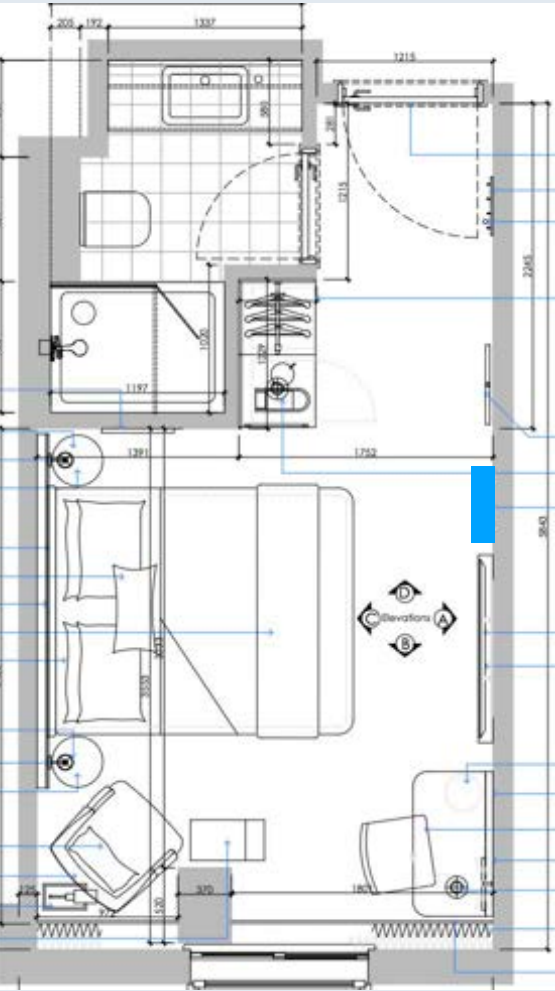

A sample we have created to show the technique using a texture covered book with folded pages and the edges on show.

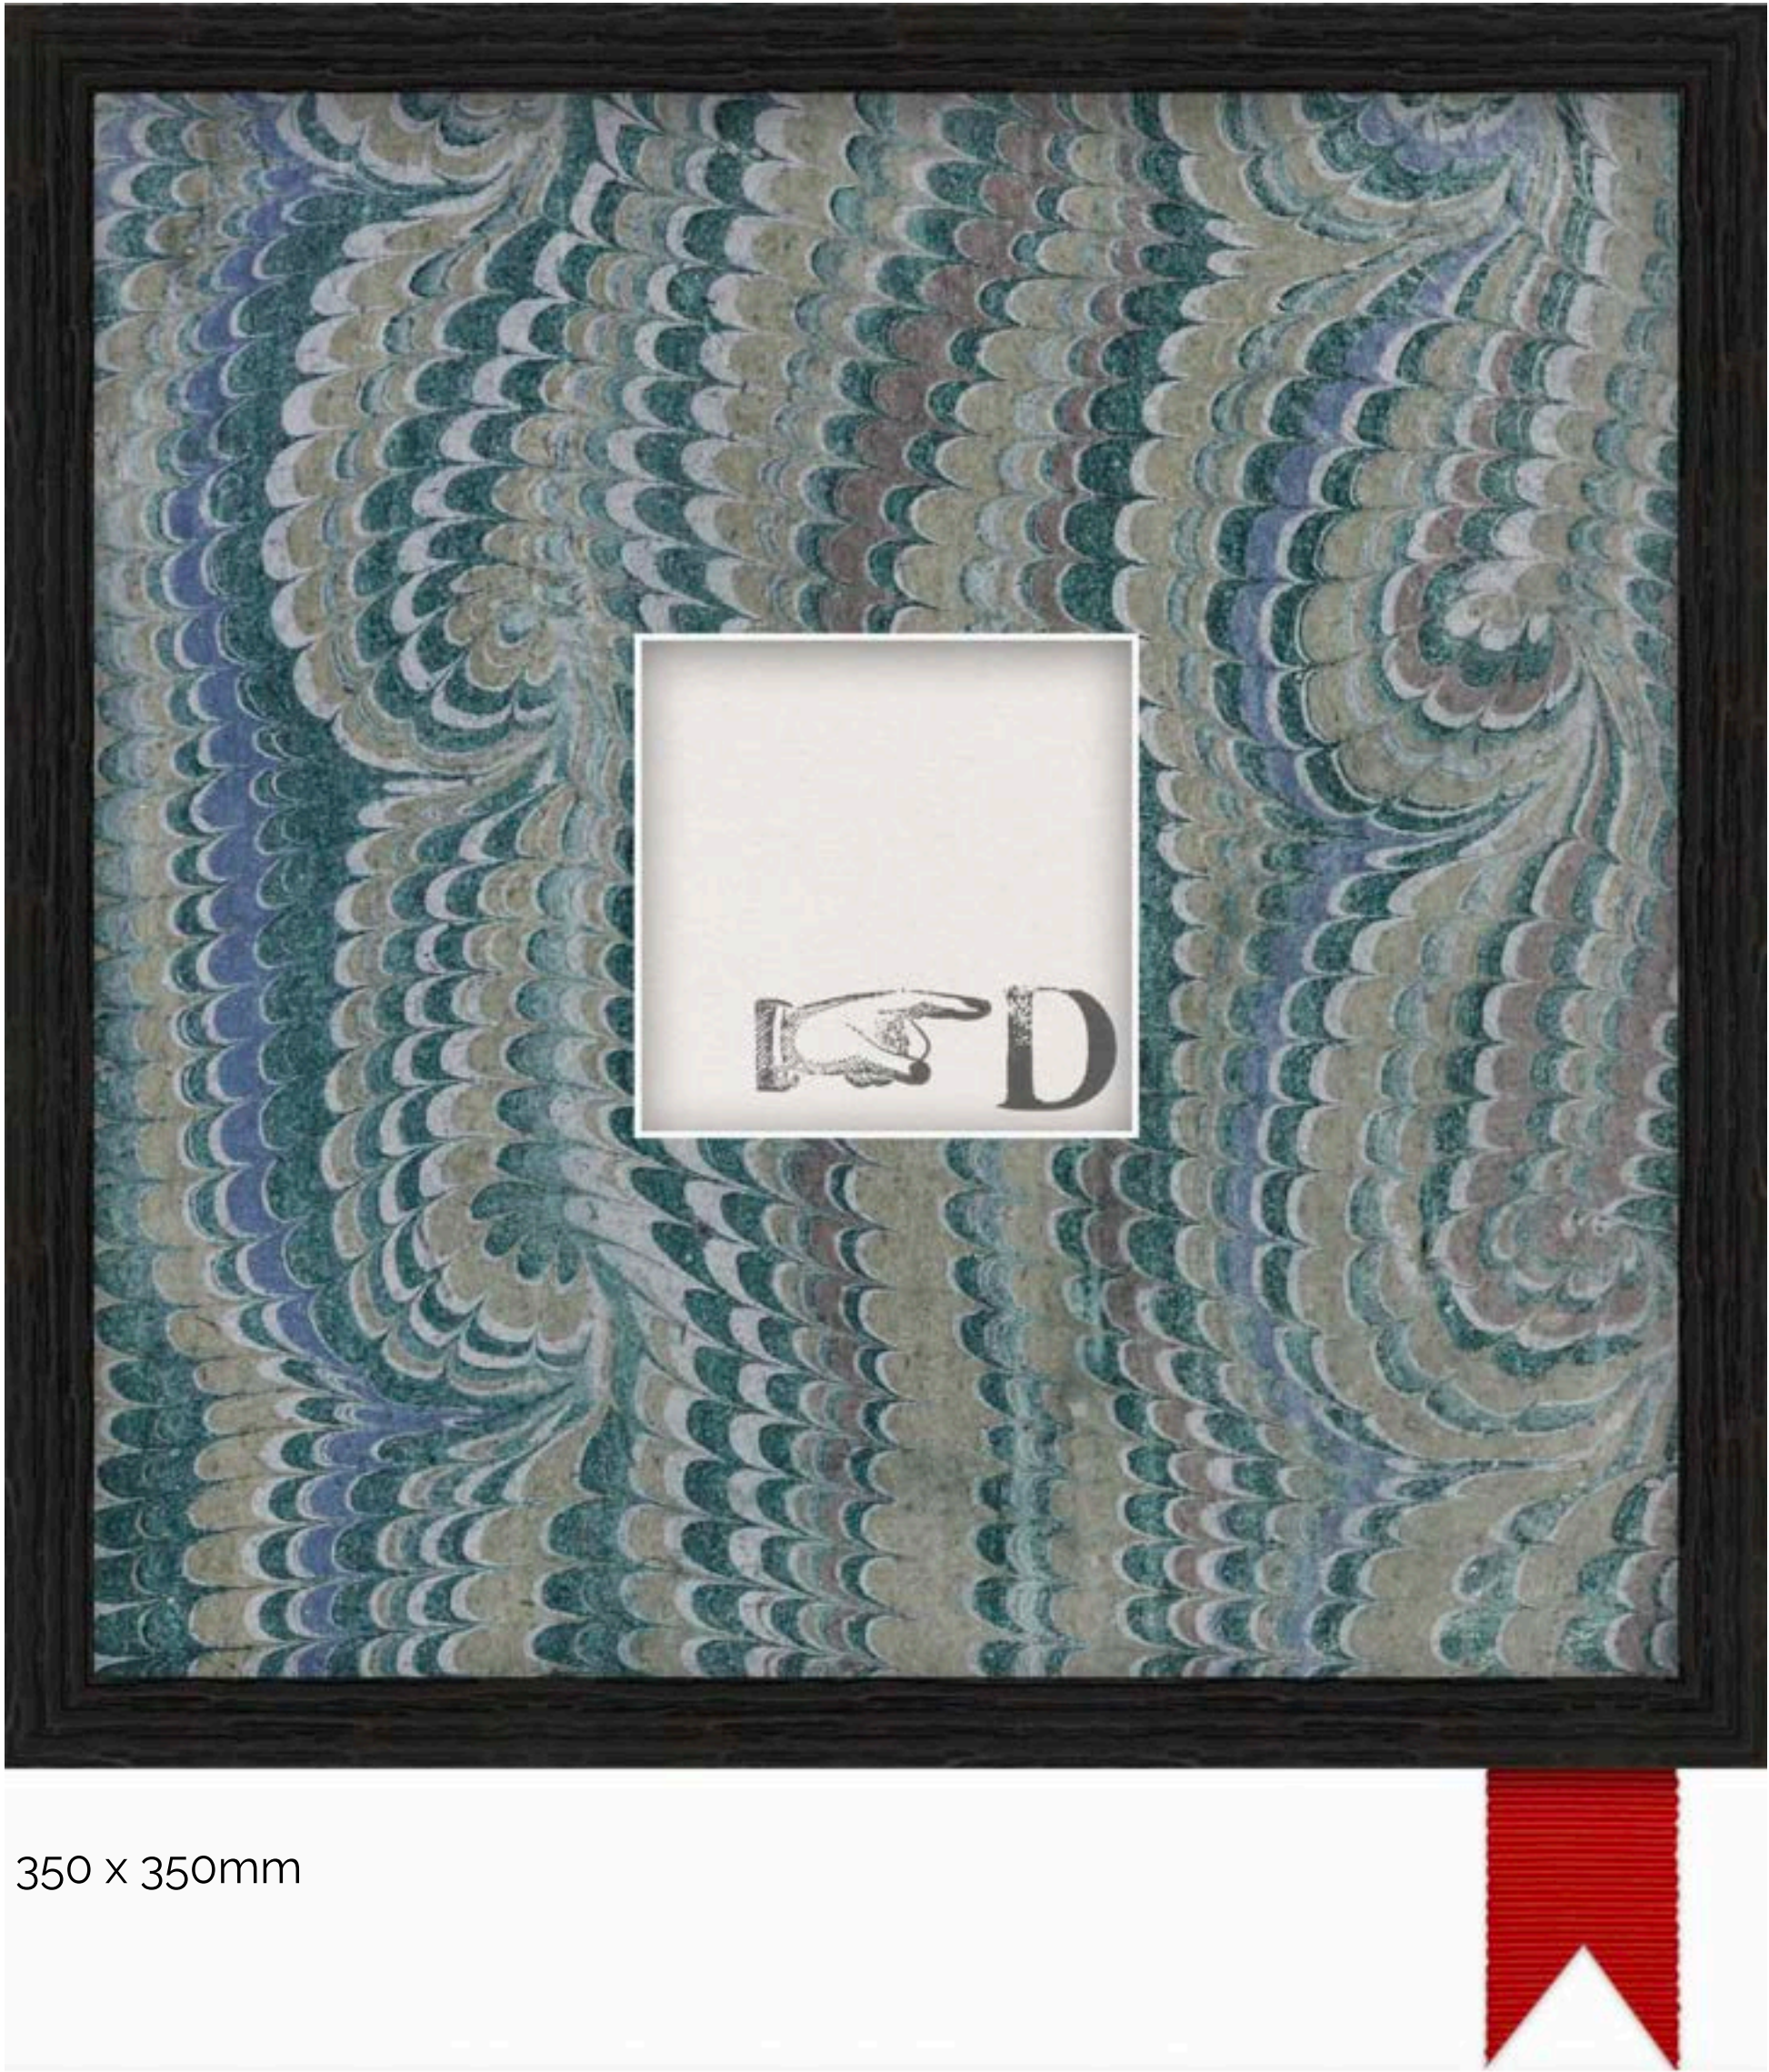

*Concept will need sampling and developing to ensure it works as a concept for the MUR.

Proposed location:
AR.P.03A

Concept:
Taking inspiration from the blending of old and new printing techniques together. A bespoke printed mount showing a marbled pattern typically found within the cover of vintage books. The central focus being on the distressed printed manicule pointing towards the letter D, which signifies Dublin.

OPTION 2:
(Risk of **guest interference** and **frayed ribbon**, will test for MUR)

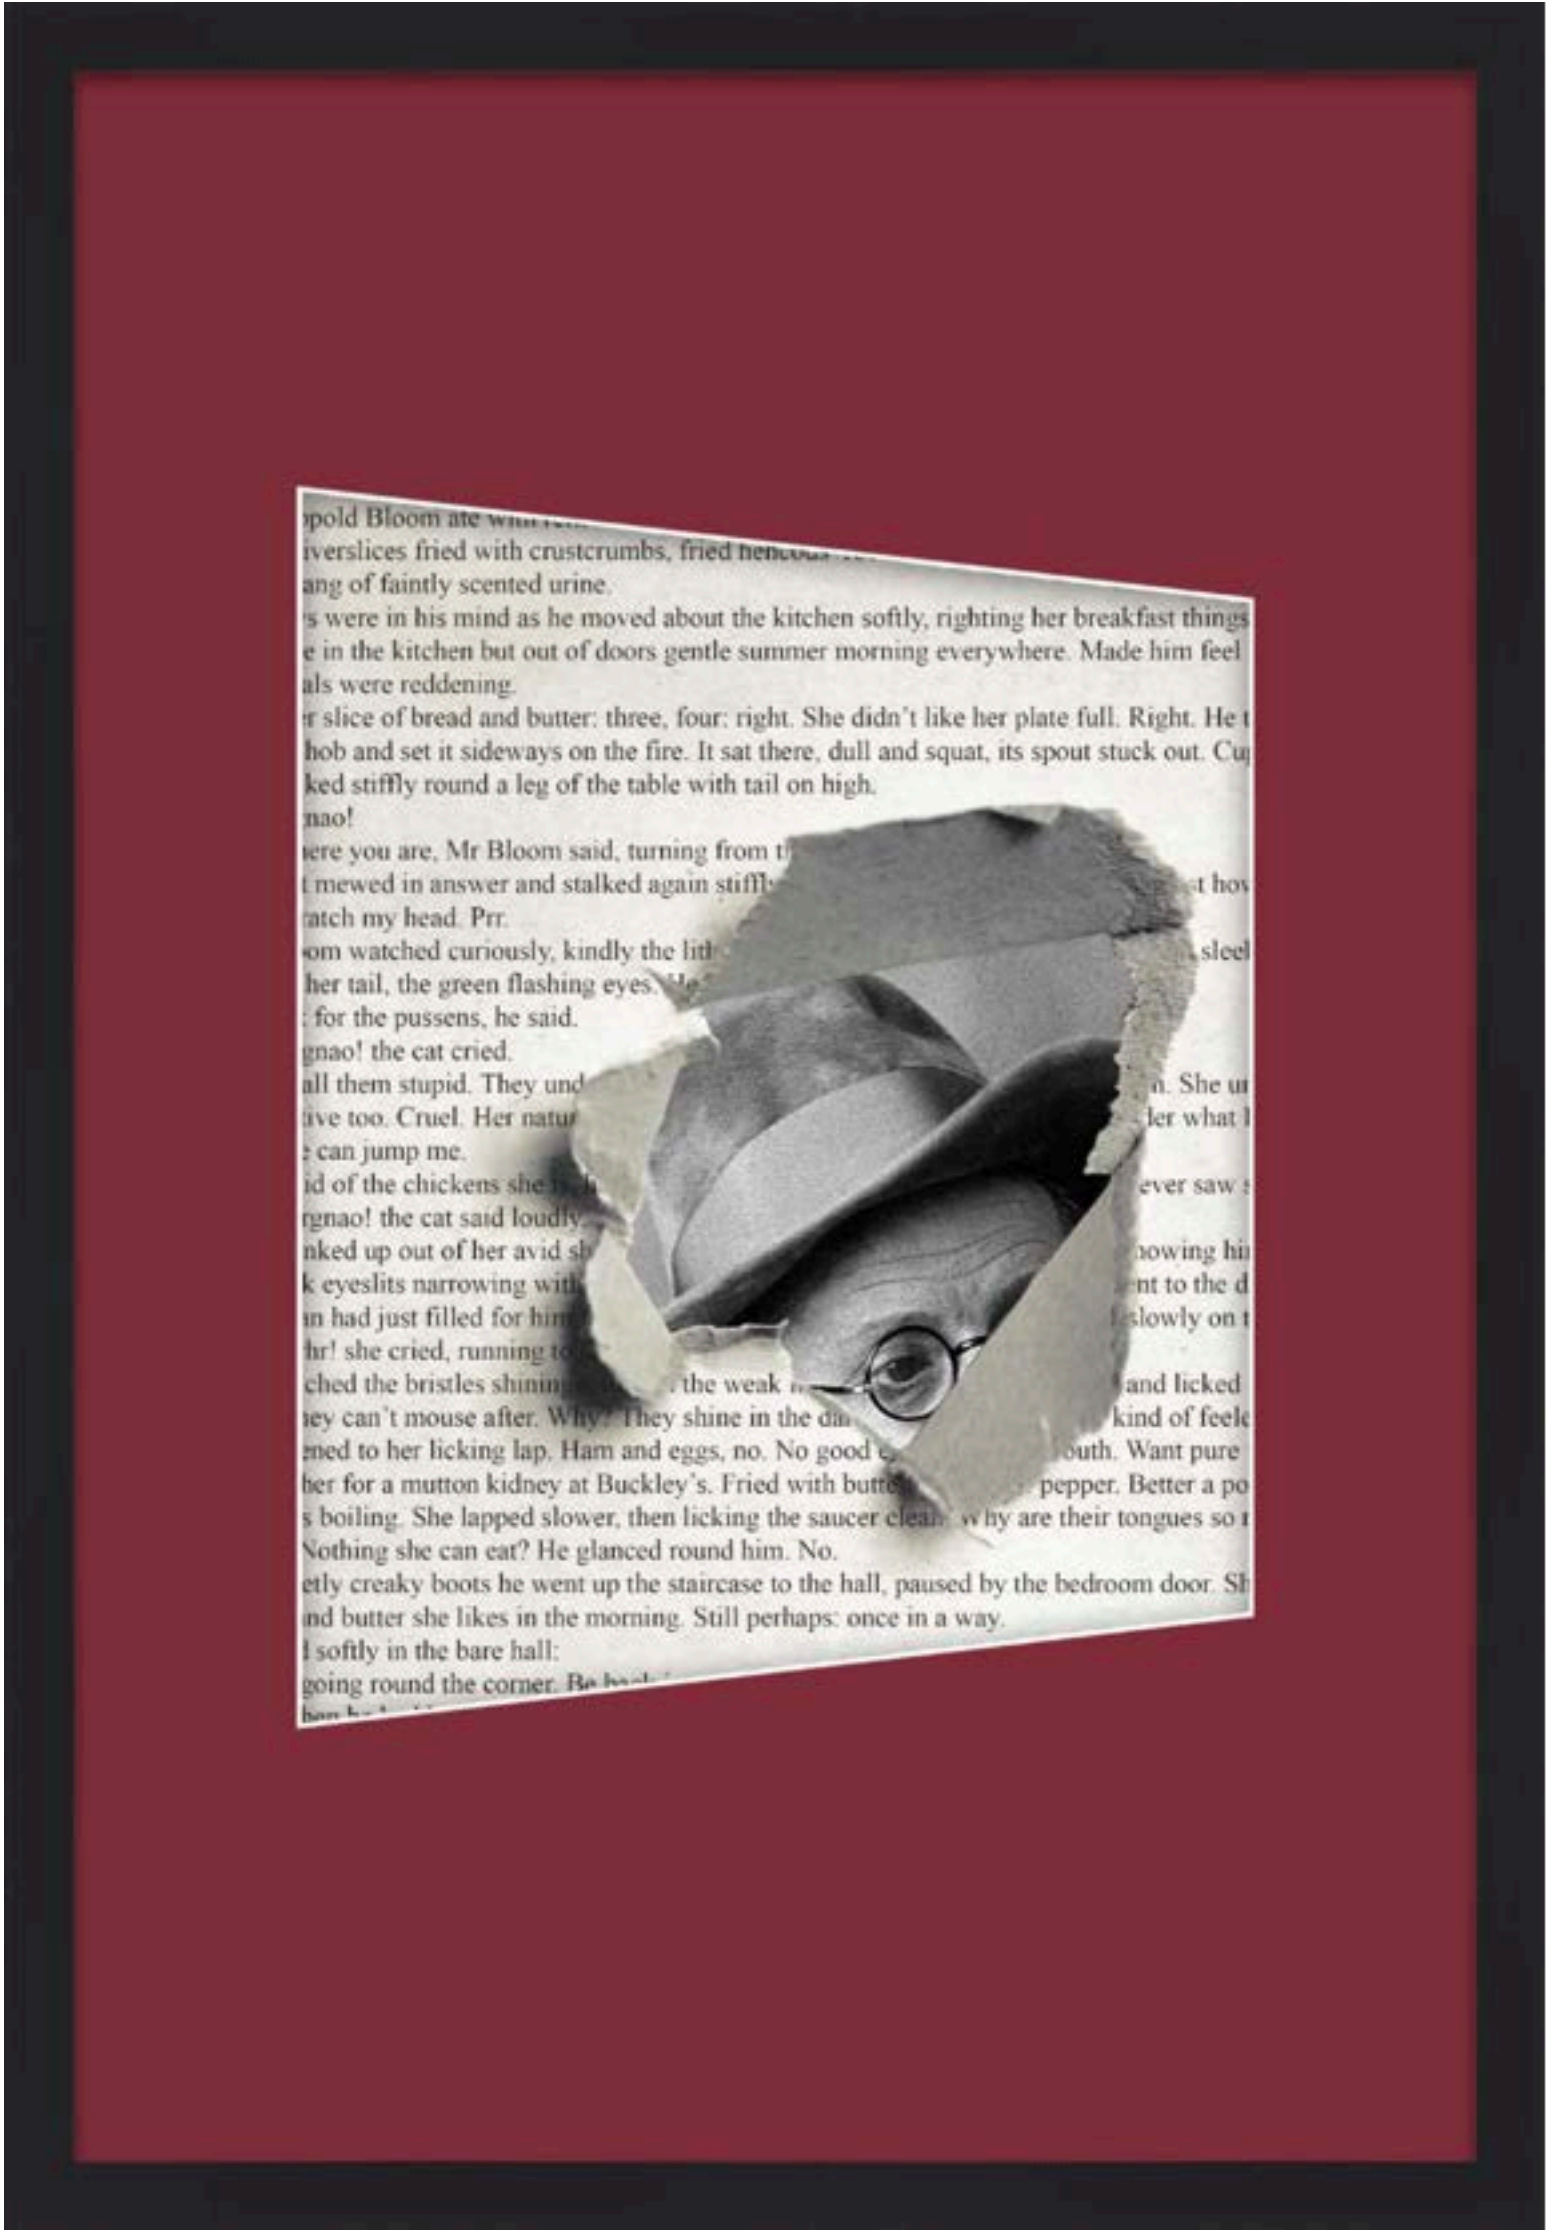

Proposed location:
AR.P.03A & AR.P.03B

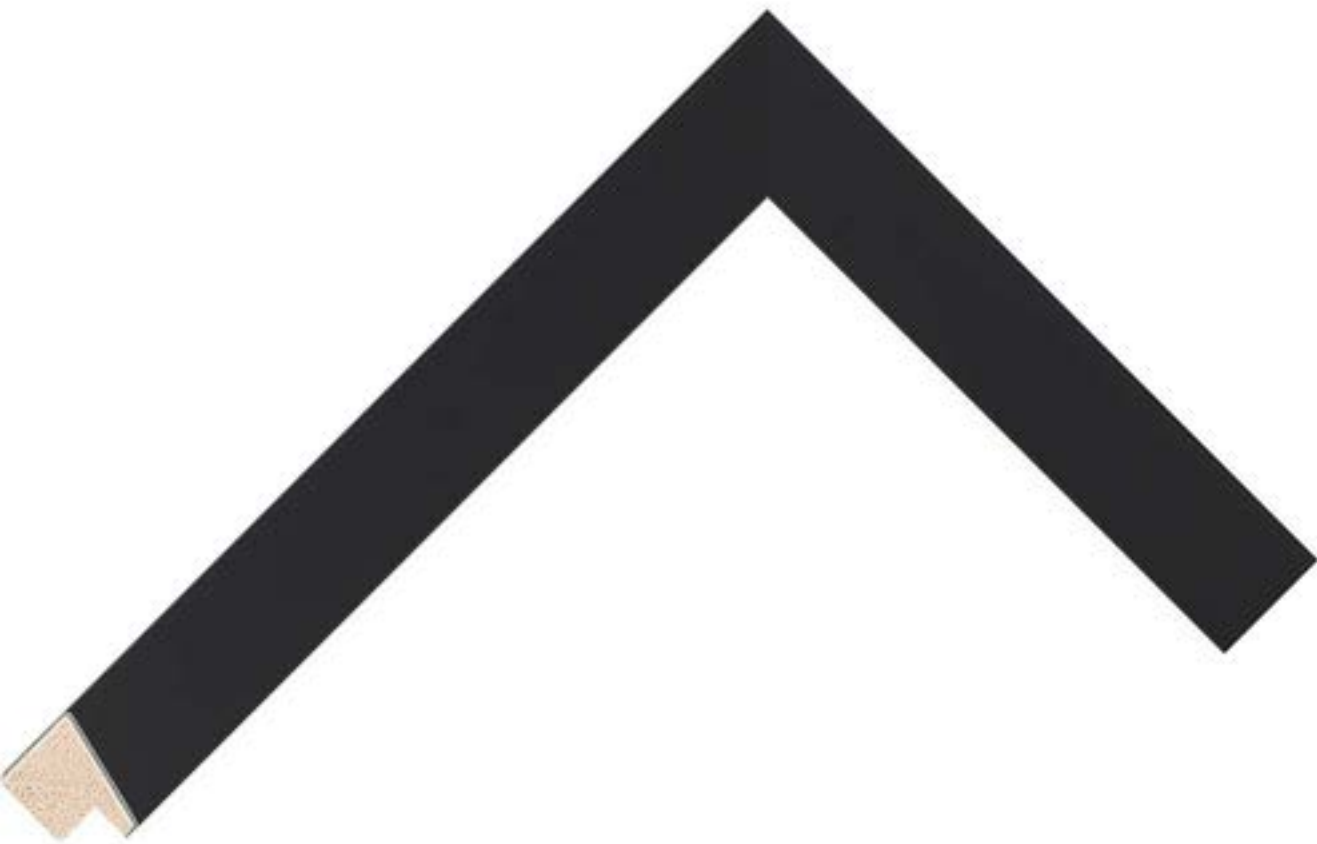

OPTION 2:
(Printed ripped paper)

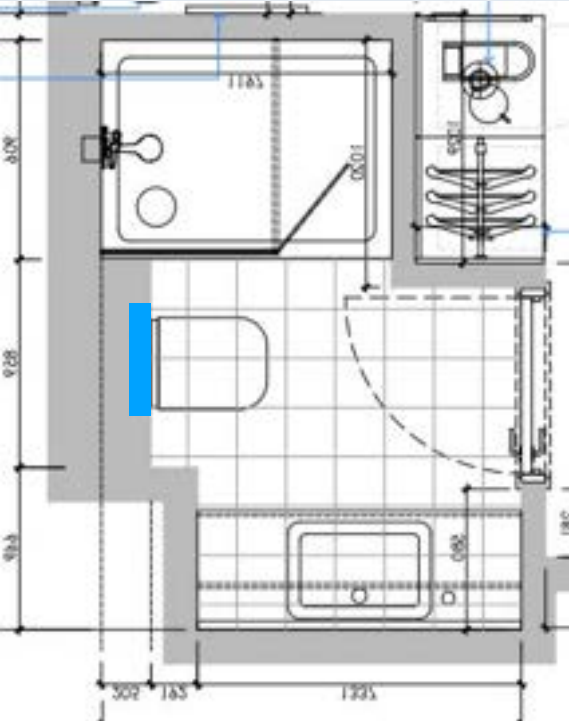

Concept:
Taking inspiration from the person behind the books. Using a section from James Joyce's book, *Ulysses* with a torn away section revealing an obscured photograph of James Joyce.

450 x 650mm

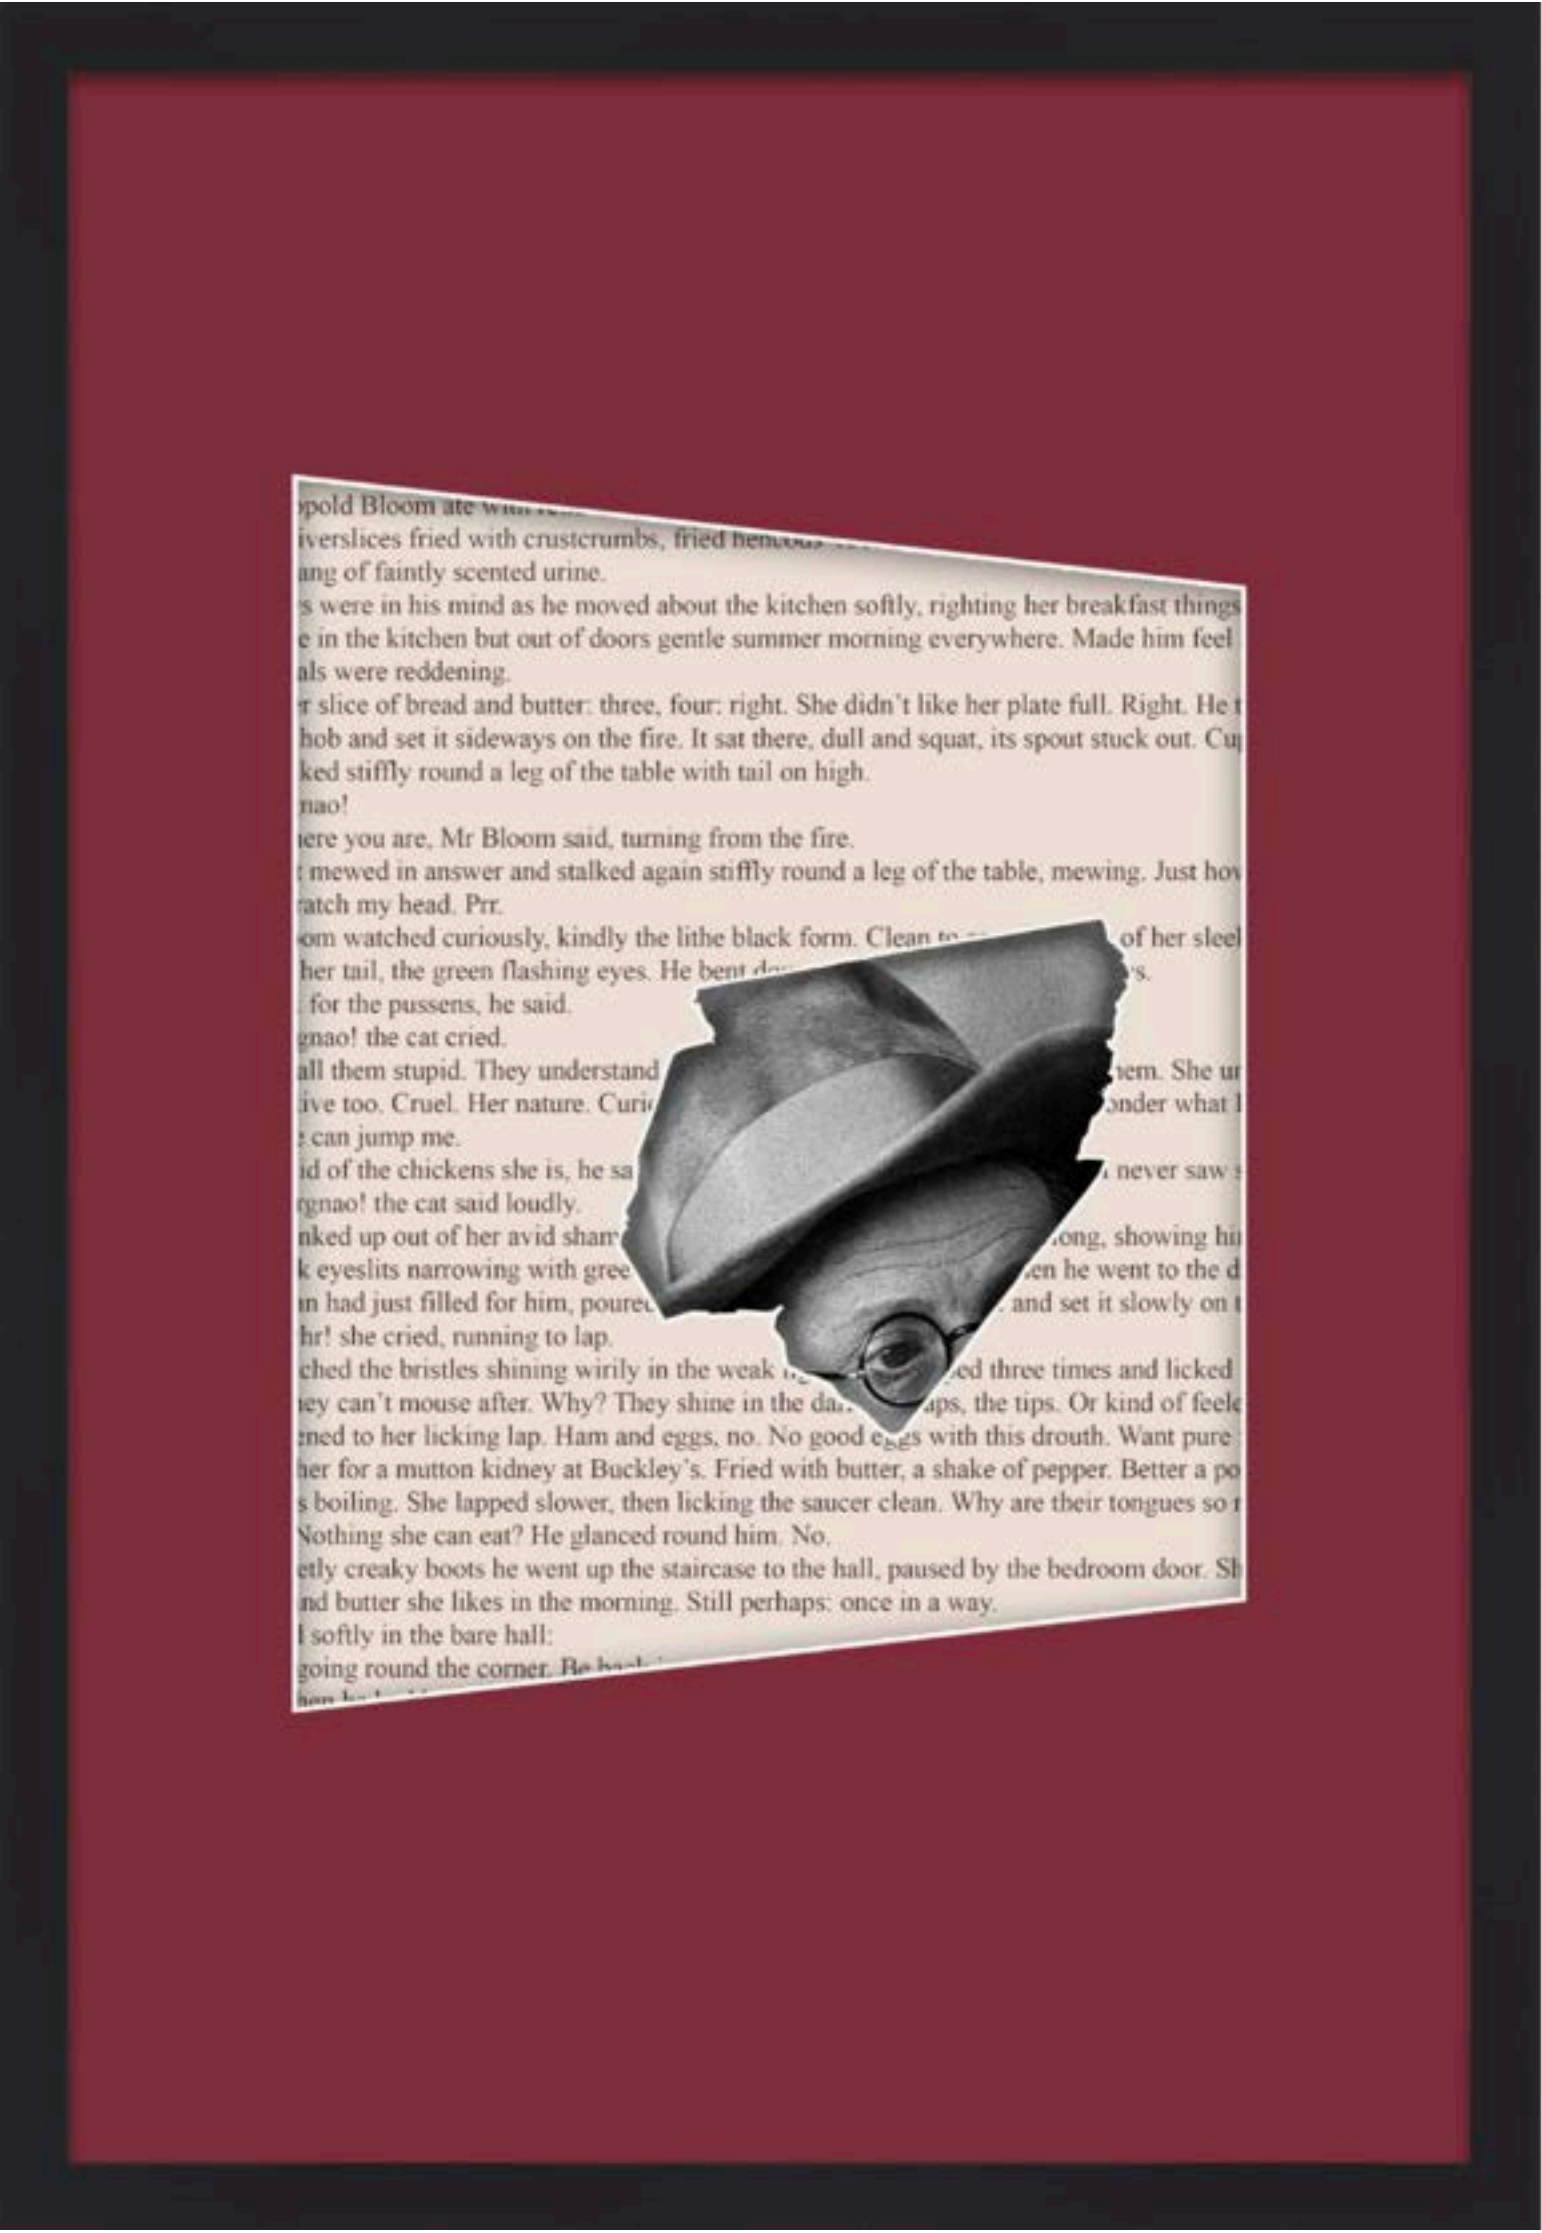

Proposed location:
AR.P.o6

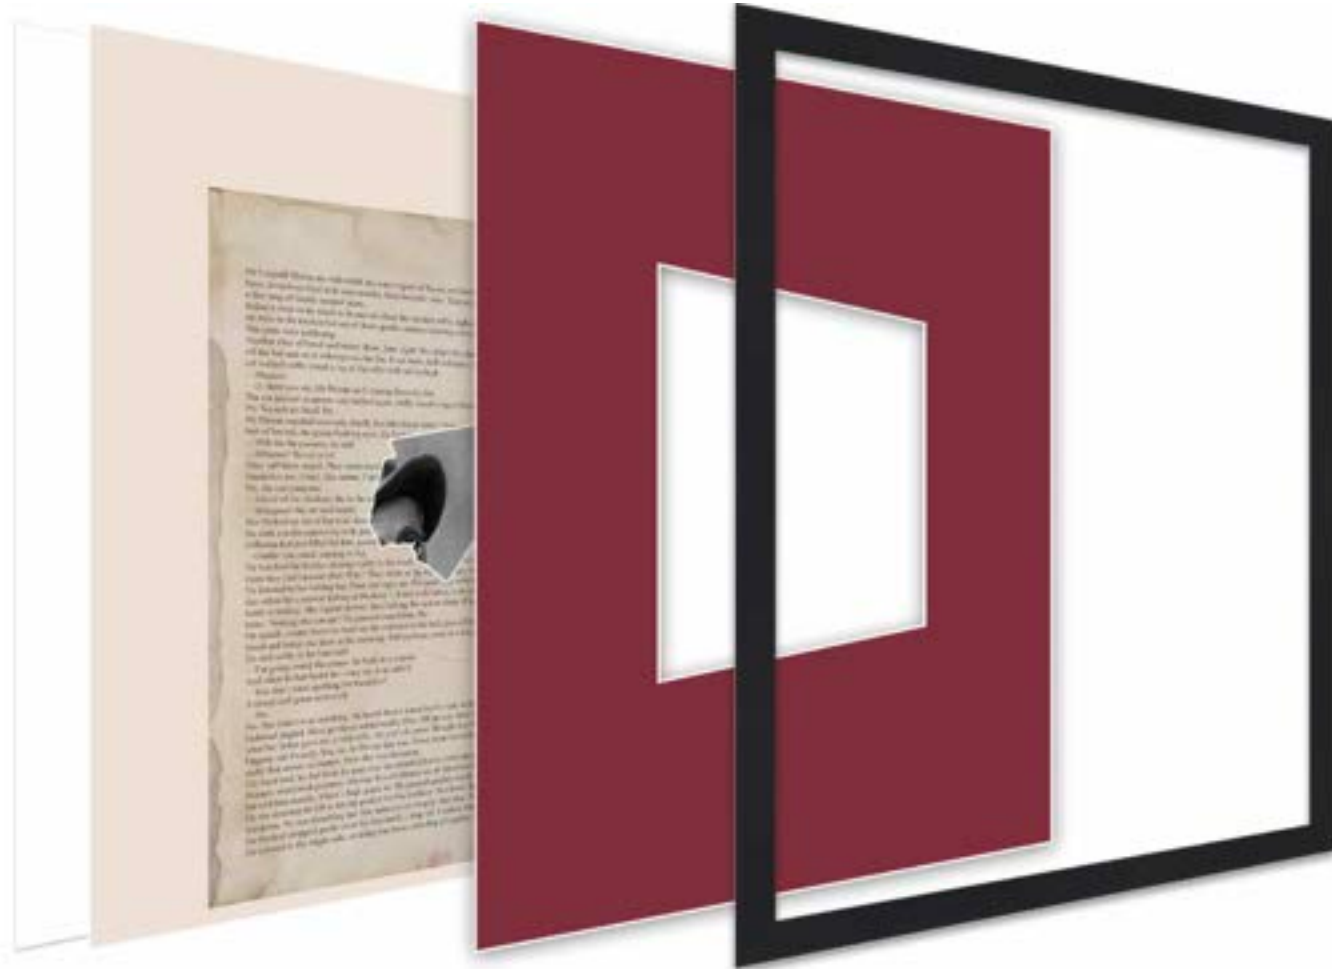

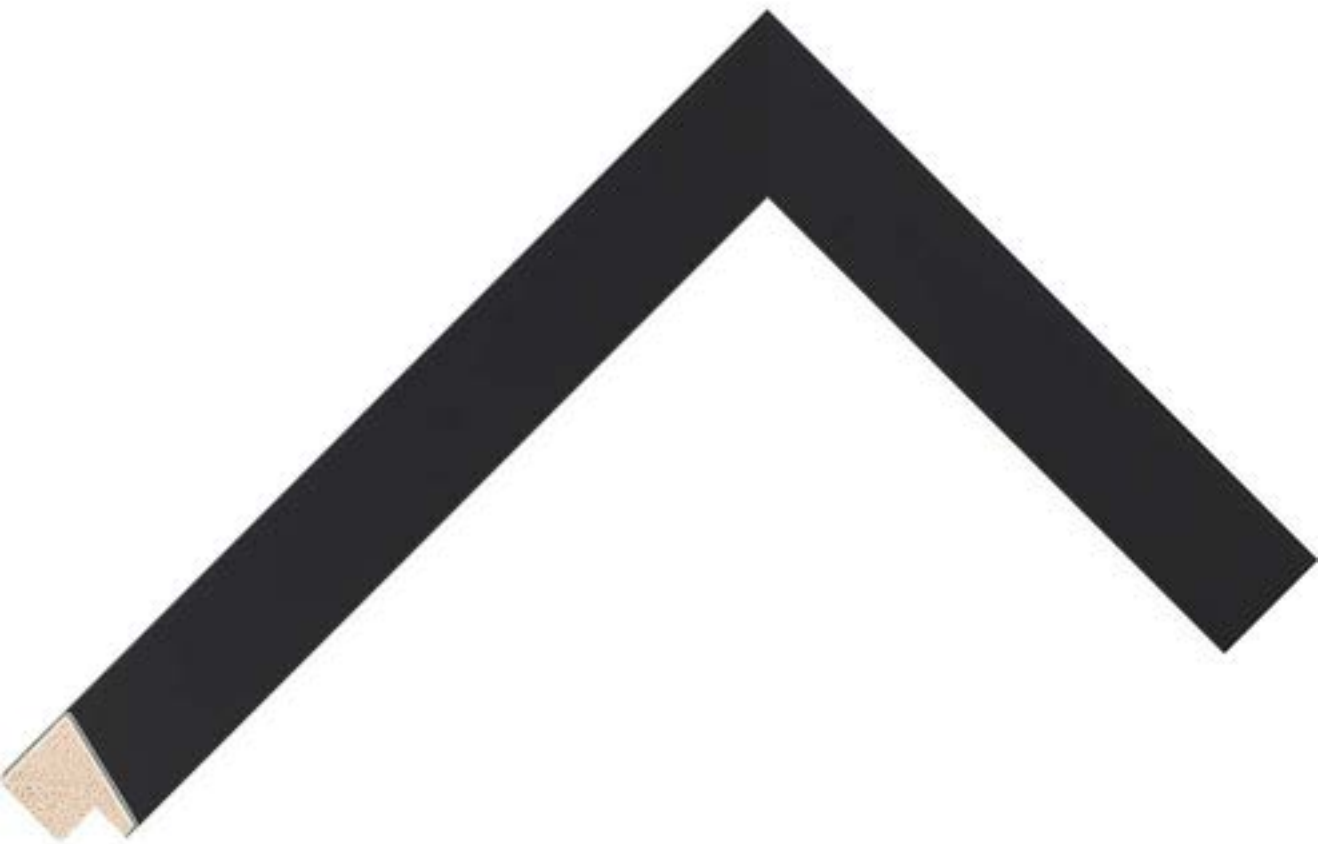

Concept:
Taking inspiration from the person behind the books. Using a section from James Joyce's book, Ulyssses with a torn away section revealing an obscured photograph of James Joyce.

OPTION 1:
(Alternative to printed ripped paper)

450 x 650mm

JEANIE JOHNSTON

On the banks of the River Liffey in Dublin's Docklands, the Jeanie Johnston is a full-sized replica of a famous ship which carried Irish emigrants to North America during the Famine (1845-1852). Over 1 million people emigrated at that time, packed onto overcrowded, disease-ridden ships on which many died en route. But no lives were ever lost on the Jeanie Johnston, likely thanks to the ship's owner, who refused to overload the ship and who provided a doctor for the voyage.

Jeanie Johnston Tall Ship and Famine Museum in Dublin tells a story of a proud Irish emigrant ship in the city centre of Dublin. Boarding the Jeanie Johnston is a step towards understanding the millions of people that headed to North America for survival and through hope & determination started a new life in the face of adversity.

A new National Famine Way has been launched, following the footsteps of 1,490 emigrants who walked from Strokestown, Co Roscommon, to Dublin at the height of the famine in 1847.

Trace the stories of Irish emigrants who became scientists, politicians, poets, artists and even outlaws all over the world at EPIC the Irish Emigration Museum.

JEANIE JOHNSTON

Grace O'Malley

The reconstruction of the Jeanie Johnston features a prominent figurehead, Grace O'Malley, who is known as Irelands, 'Pirate Queen'. O'Malley is considered a maritime leader of her time which was exceptionally rare as a female in the 16th century. The featuring of Grace O'Malley onto the Jeanie Johnston signifies Ireland's rich nautical heritage.

Jeanie Johnston

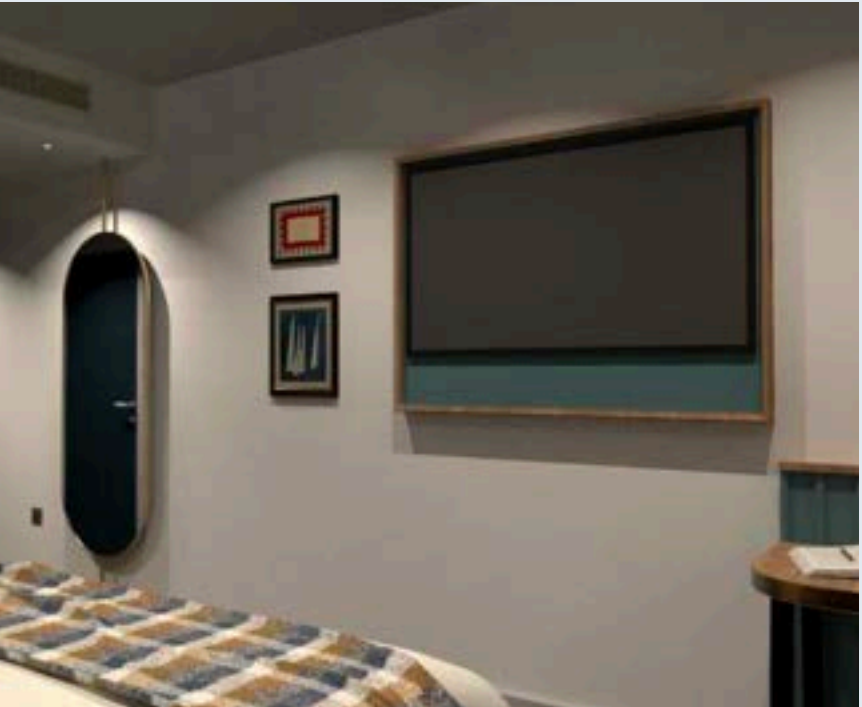

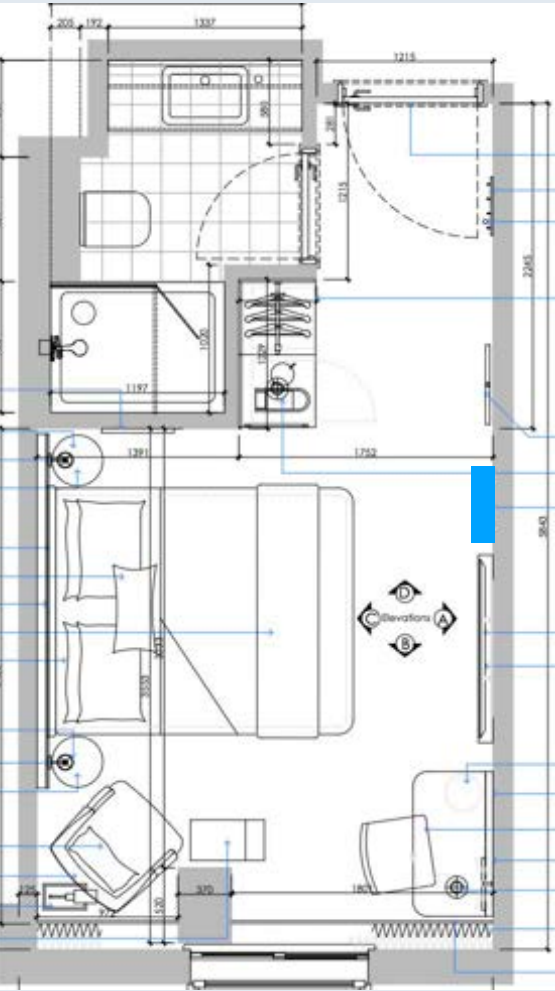

Recognising the materials and craftsmanship of the original ship as well as the reconstructed Jeanie Johnston. Originally the ship was made from Quebec Oak and Oregon Pine and was constructed in Quebec, Canada. When reconstructed in 2002, the ship was built in Blennerville, County Kerry and utilised local materials, mostly using wood from Irish forests.

The passengers & crew

The Jeanie Johnston completed 16 voyages carrying 2,500 people from all walks of life looking to start a new life and escape the famine in Ireland. In total, over 1 million people fled Ireland and most unfortunately didn't make it to start their new life. However, the Jeanie Johnston's Captain, James Attridge, and the ships doctor, Dr. Richard Blennerhassett, created a safe and disease free environment for the passenger's so all of the 2,500 passengers made it to their final destination safely due to the humanity of the Ship's crew .

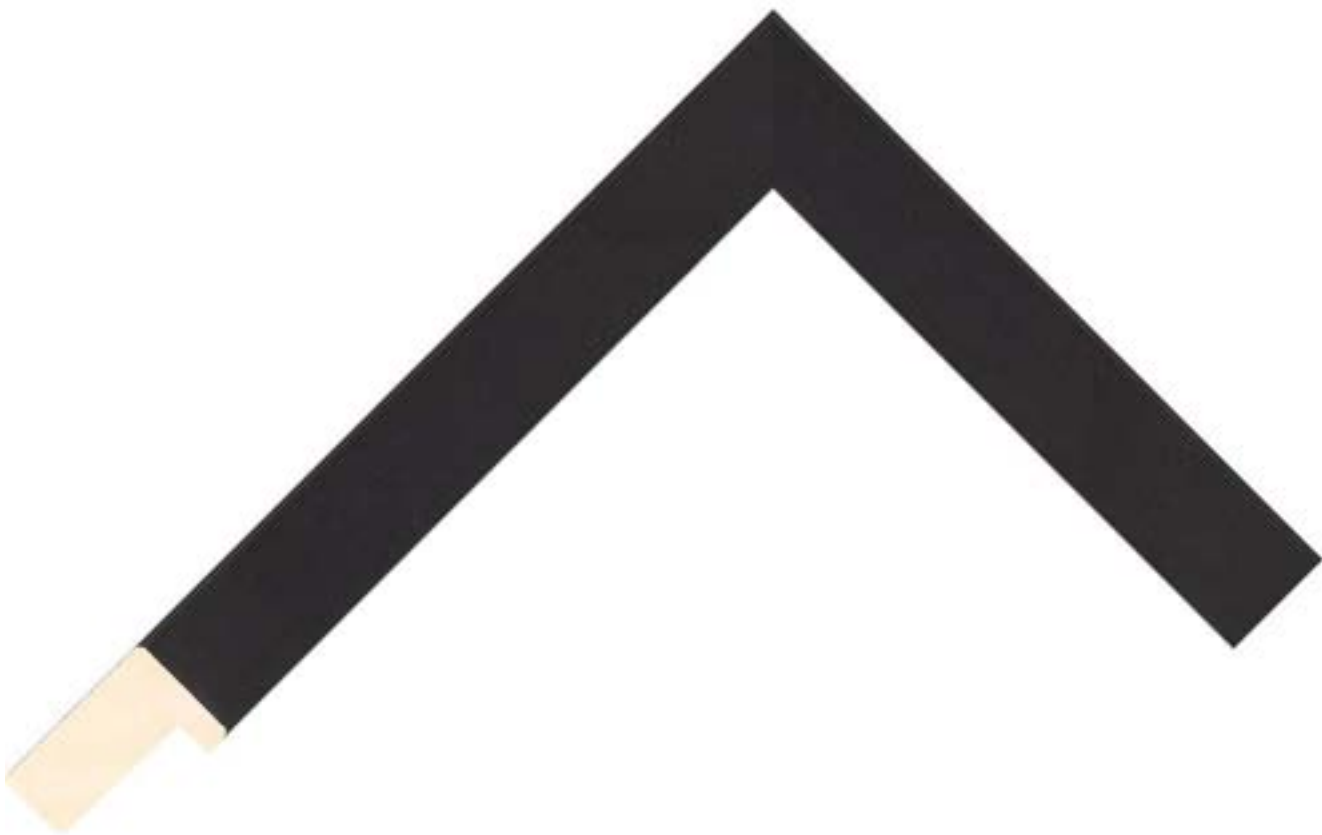

Proposed location:
AR.P.03A

Concept:
Taking inspiration from the Jeanie Johnston boat itself and the materials that have been used to create the ship. Framing a nautical knot in a bright orange cord, which co-ordinates with the colours in the other pieces in the room, paired with a printed painterly mount card to frame the knot.

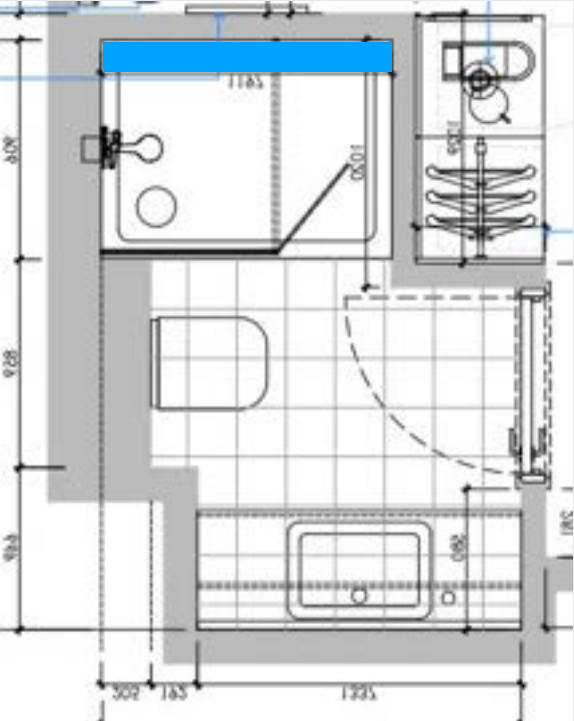

400 x 500mm

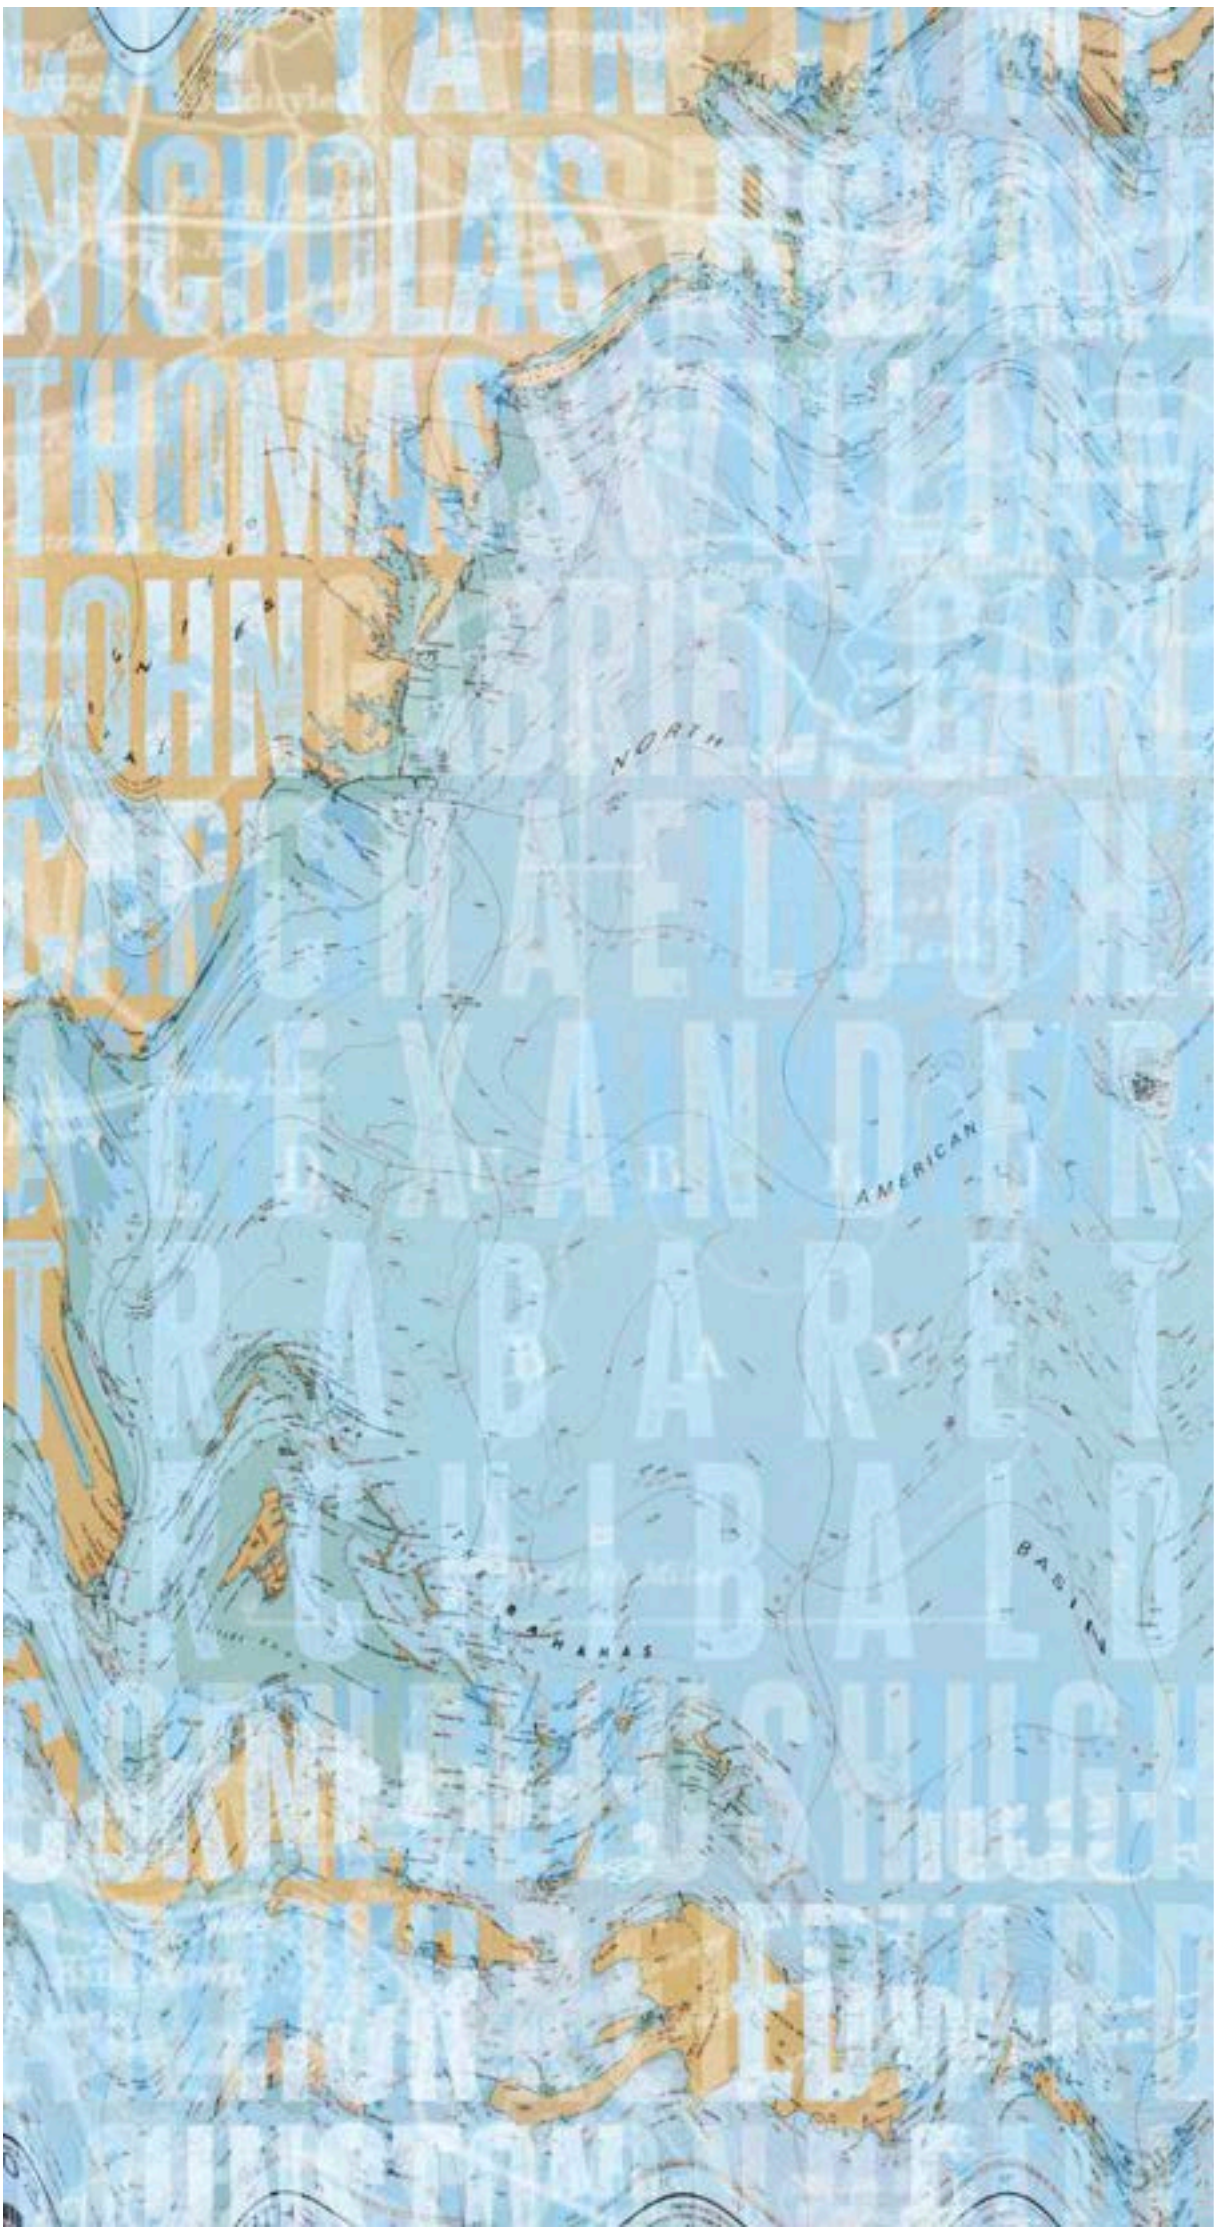

Proposed location:
AR.P.03A & AR.P.03B

Proposed location:
AR.P.07

Concept:
Taking inspiration from the crew who were on board the ship, Nicholas, Richard, James, Thomas, William, John, Gabriel, Carls, Michael, John, Alexander, Trabaret, Archibald, Cornelius, Hugh, Arthur, Edward, Johnston and Reilly. Blending this together with a ripple distorted map of the Atlantic and a distorted map of Dublin Bay.

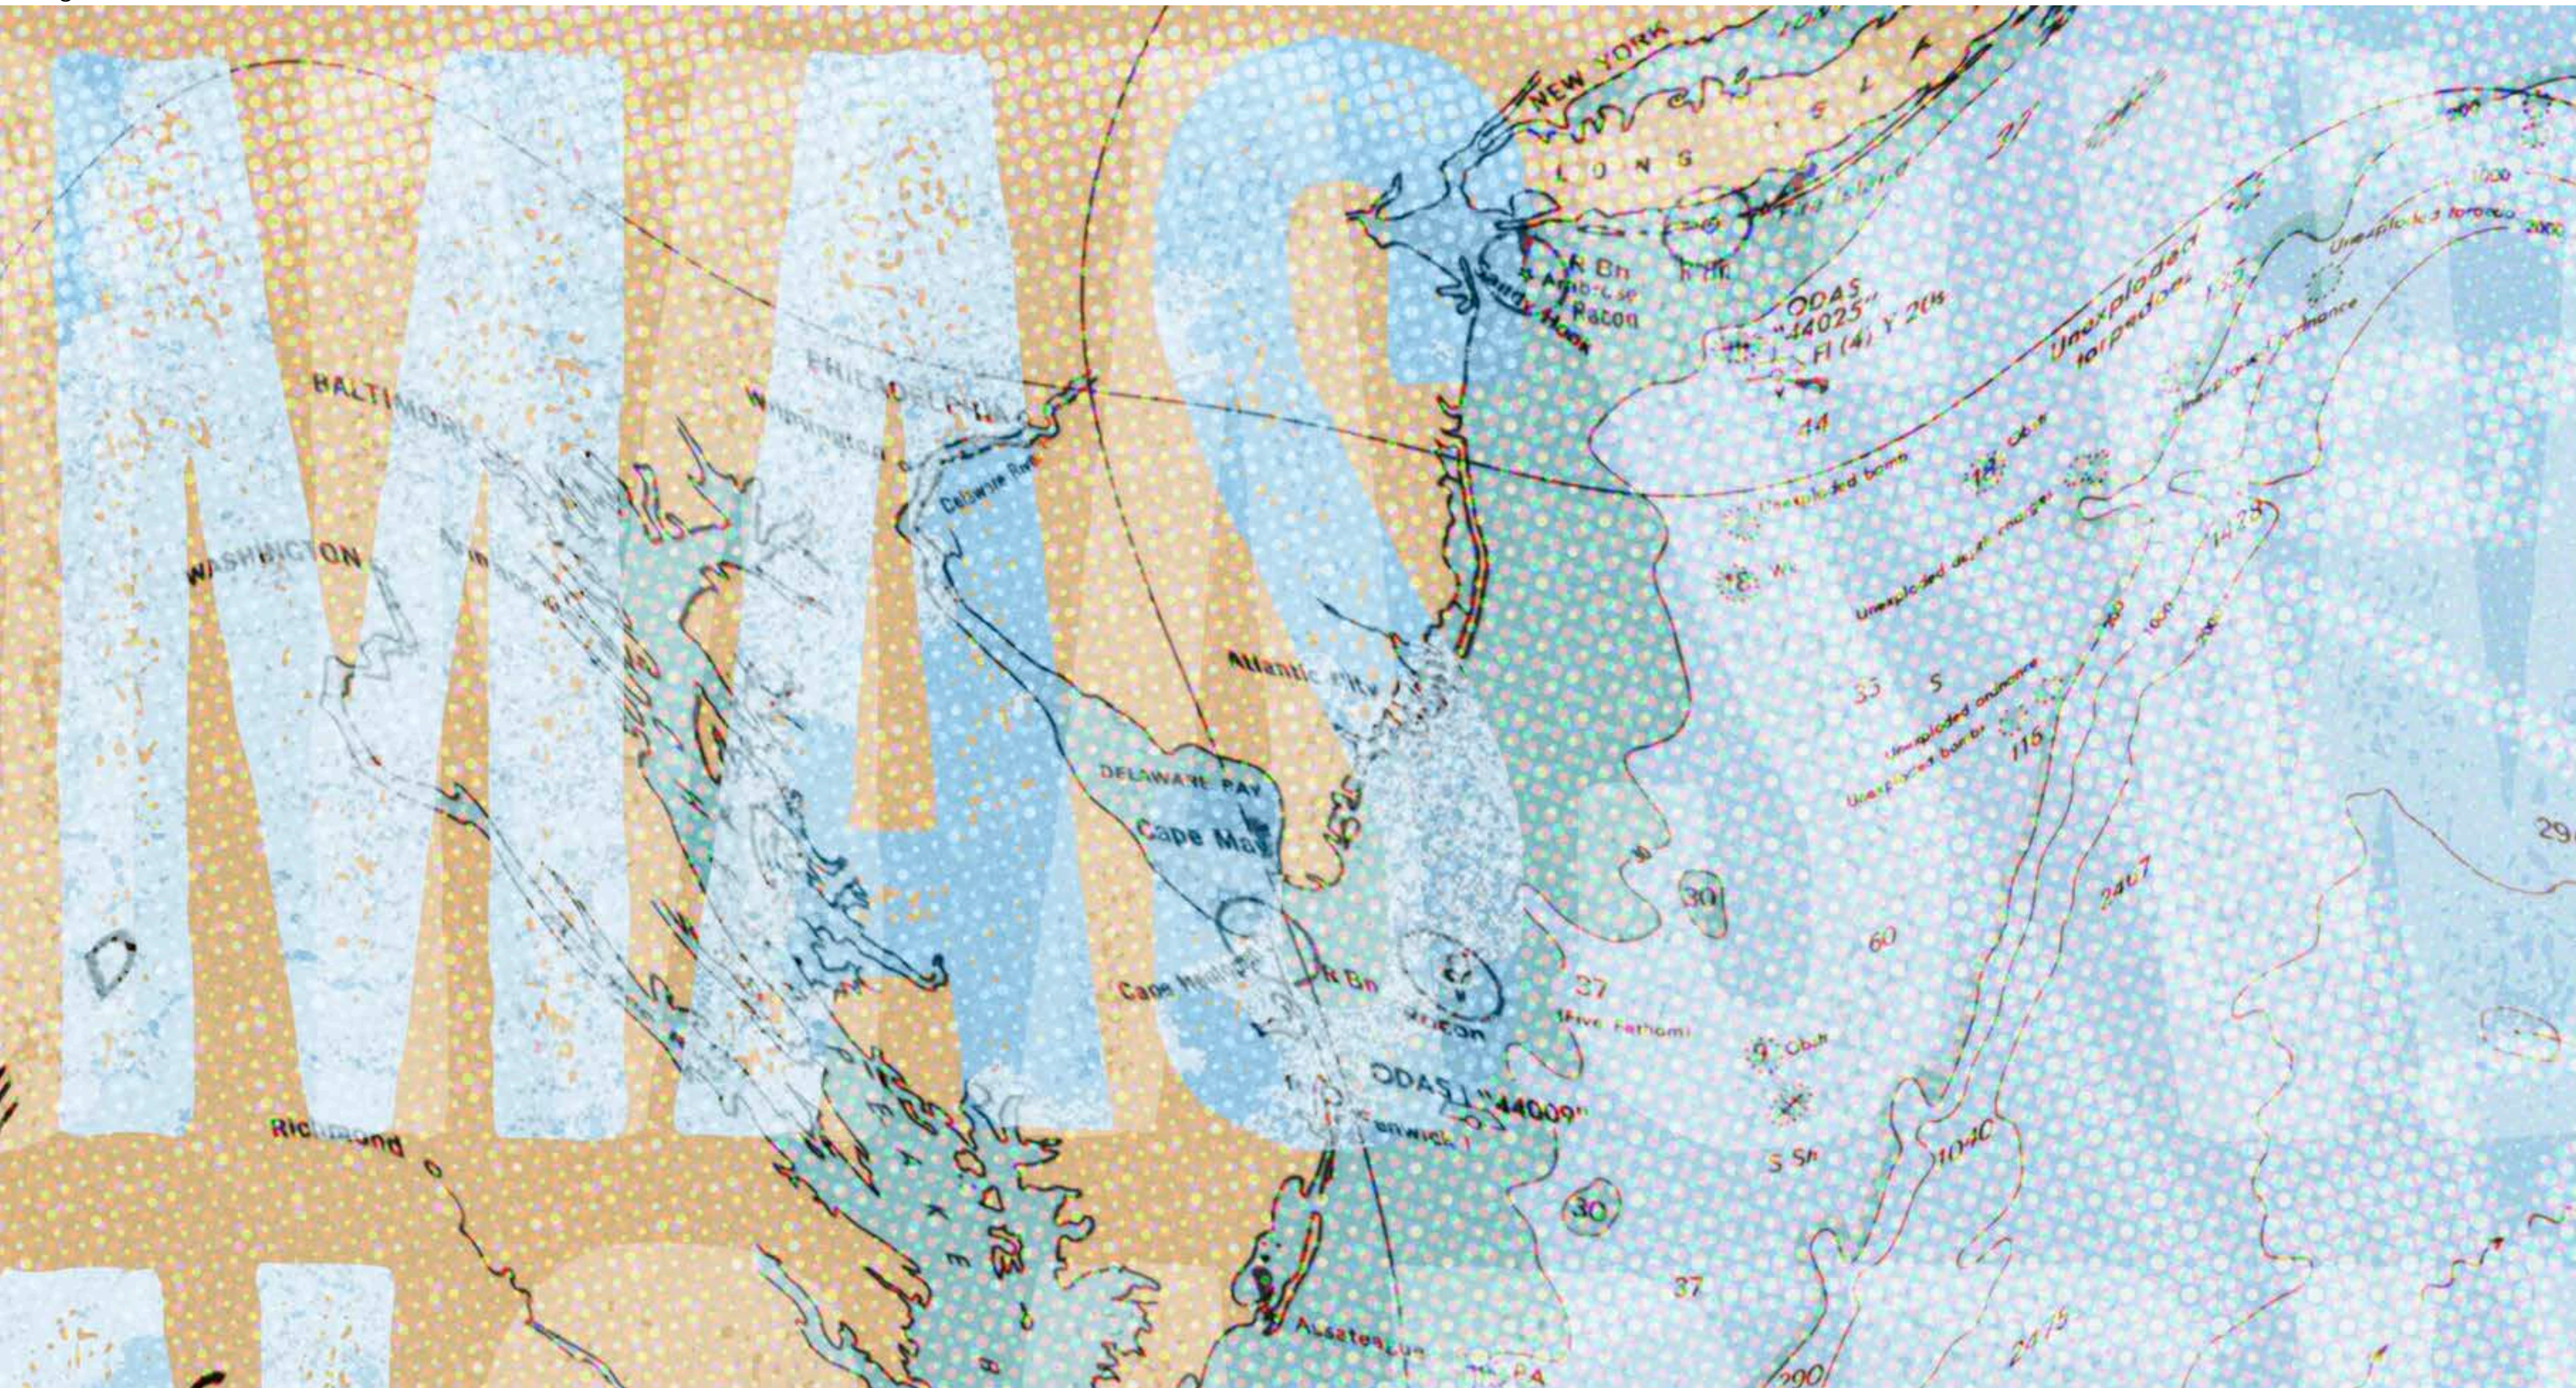

1200 x 2200mm

Close up details:

Design to scale:

100mm

Proposed locations:
AR.P.05, AR.P.06 & AR.P.07
